

Amazon EC2 G3 Instances: High-Performance GPU Instances for Graphics-Intensive Needs

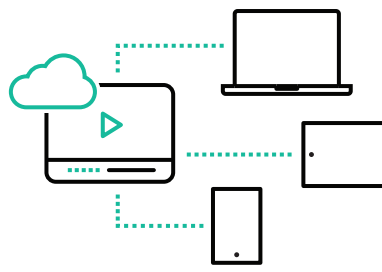

G3 Instances, powered by NVIDIA GPUs, deliver high-fidelity content and enable delivering next generation graphics applications with unparalleled agility.

▶ Using G3 Instances

G3 Instances are ideal for graphics-intensive applications including:

Virtual workstations

Video transcoding

Virtual desktops

▶ Reimagining the Workstation

Where you want

Access high-end virtual workstations wherever you are in the world, allowing for agile decision-making and collaboration

When you want

Spin up resources anytime you need them, and shut them down when work is completed

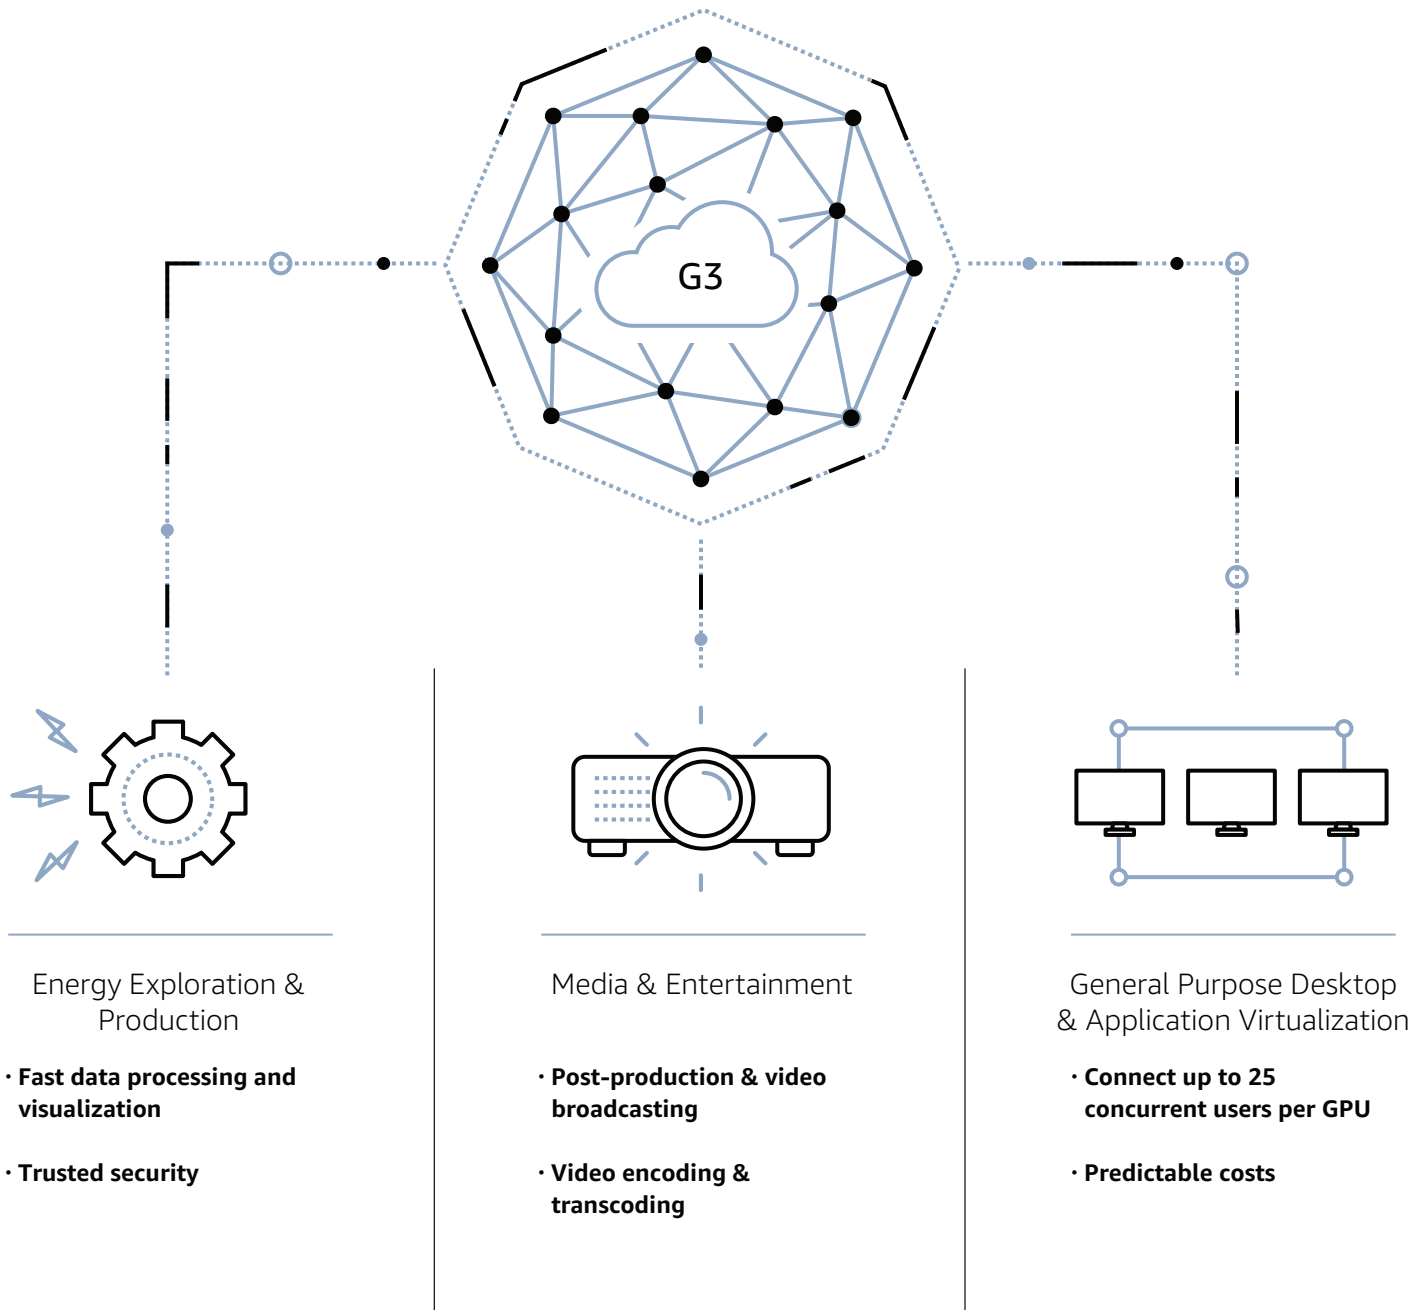

How you want

With different instance sizes, sign up for the power you need to keep costs predictable and output efficient

▶ Disrupt Your Industry

G3 Instances are the ideal platform to serve your graphics intensive applications.
