Acumatica Cloud ERP
The best business management solution for transforming your company to thrive in the new digital economy

Why Acumatica?

Application Benefits
- Allow users to customize their own personal workspaces
- Tailor reports and create actionable, role-based dashboards
- Save time and minimize errors with automated workflows configurable for your business processes
- Increase staff productivity with shared documents, AI-powered processes, and automated business events

System Benefits
- Provide 24/7 system access from any location on any device. Content automatically adapts to various screen sizes, orientations, and resolutions
- Support multiple configuration options to match the way you do business, including single- or multi-tenancy, multiple business entities, and cloud deployment options
- Support multiple languages and base currencies for global businesses
- Secure sensitive company data by limiting user access with role-based security and data encryption for sensitive data
- Monitor and audit user activities. Track user changes with comprehensive audit tracking.

Product overview

Get the Cloud ERP solution that helps rapid-growth companies thrive in the digital economy. Acumatica’s xRP platform on AWS is designed for the way businesses operate today—and tomorrow.

Grow your company on a comprehensive business management suite with best-in-class functionality, powerful automation, and flexible configuration options. Establish a future-proof, mobile platform built for emerging technologies with rapid development tools to support your needs for decades to come.

Product features

- **Technology Leadership on a Future-Proof Cloud Platform:**
  Establish a future-proof, mobile business platform with embedded artificial intelligence and machine learning with open connectivity and rapid development tools to support your business needs now and as your needs change. Empower employees with a modern ERP application that is easy to use, easy to learn, and adaptable to their specific roles in the organization.

- **Best-in-Class Business and Industry Functionality:**
  Advanced financial features for deferred and recurring revenue, project accounting, contract or policy management, billing, asset depreciation, and payroll provide a holistic system for growing businesses. Industry-specific features support manufacturers, distributors, retailers, construction firms, and service-oriented organizations.

- **Customer-Friendly Business Practices:**
  Partner with an ethical ERP leader focused solely on your business application. Client-centric policies include unlimited user access, free online training, 24/7 customer service with dual layers of support, and a formalized “Customer Bill-of-Rights” as part of every license contract.
How it works

Single data model, flexible deployments, streamlined integrations

Shared data and cross-team workflows make collaboration seamless, and AI-powered automation drives efficiency. Acumatica is ranked highest in user experience and usability, which makes it easy to drive adoption and collaboration across your company. Integrating other tools and software is easy—either through the broad Acumatica Marketplace or developer-friendly custom integrations.

In addition to industry best-practices around data security and privacy, you get configurable, role-based permissions that ensure you can safely collaborate inside and outside your organization.

Differentiators of Acumatica’s xRP Platform

1. **Universal Platform** – all applications reside in the same environment
2. **Familiar Environment** – built on industry standard Microsoft .NET, HTML 5, and Visual Studio Integrated Development Environment
3. **Speed to Market** – Acumatica xRP is architected for scale, performance, and flexibility
4. **Protect Investments** – Abstract the application code from technology changes through the Acumatica middle tier.
5. **Low Code / No Code Customizations** – Business process experts can make simple application changes and update workflows without detailed programming knowledge.
6. **Artificial Intelligence** – Used throughout the ERP application to automate processes around accounts payable bills, expense matching, OCR scanning for documents, and many other business operations.
7. **Workflow and Alerts** – Create business events for text or email alerts to manage your business by exception.
8. **Collaborate Freely** – Add users with no additional license fees. Foster collaboration between employees, customers, vendors, and external business partners.
9. **Award-winning usability** – The logical user interface enhances user adoption both across the organization and with external trading partners.
10. **On-the-Go Mobility** – supports any iOS and Android device, empowering users to work from anywhere.
What our customers are saying

Carlson-LaVine Enlists Acumatica to Attract Talent & Build for the Future

**Challenge**
To remain competitive and grow, Carlson-LaVine Inc. needed to replace its legacy on-premises Sage financial system which was holding the business back. The construction firm needed a cloud-based solution that users could access remotely.

**Solution**
Carlson-LaVine reviewed Viewpoint and Sage Intacct, among others, eventually selecting Acumatica Cloud ERP deployed on the AWS cloud. Acumatica has a Construction Edition, an open API for integration and comes with a unique licensing model based on consumption rather than cost per user.

**Benefits**
- Equipped employees with a modern tool, increasing productivity and gaining an edge in recruiting new staff
- Cut payroll processing time nearly 100 percent, from 1.5 days to just 10 minutes
- Improved communications, providing more timely information to employees, customers, unions and subcontractors

"With Acumatica, I’m giving employees an ultra-efficient tool they need to do their jobs correctly and allowing them to do things easier. I’m handing them a smartphone versus a rotary phone. They are more well-equipped to do their jobs, which produces good outcomes for customers and helps us build the business."

Matthew Shamp, Executive Director, Carlson-LaVine Inc.
