BigID Cloud

Cloud-native actionable data intelligence for data discovery, privacy, security, and governance.

Why BigID?

- 360° coverage of sensitive data
- Find and inventory all personal data (PI and PII)
- Operationalize compliance for regulations such as GDPR and CCPA
- Automate data rights access & DSARs
- Build & measure data risk KPIs
- Integrations with leading case management, GRC, privacy, security, data governance products

Product overview

BigID is a modern data intelligence platform built to scale, based on Docker and Kubernetes architecture: combining discovery-in-depth (with more ways to discover data using classification, cataloging, cluster analysis, and correlation), unmatched data coverage for all types of personal and sensitive data (in data centers and the cloud; at rest or in motion), and an extensible app framework to take action on privacy, protection, and perspective.

Product features

Discovery-in-Depth

First-of-its-kind, scalable, data discovery that combines Machine Learning (ML)-based cataloging, classification, cluster analysis, and correlation in one solution. Leverage BigID so that privacy, security and data governance have a single source of data truth.

Unmatched data coverage

Apply Discovery-in-Depth across more types of data sources and data pipelines in the cloud or data center to achieve the broadest data coverage in the market for data on-premises, in the cloud, and everywhere in between.

Extensible App & API framework

Expand your functionality by future-proofing your data investment with BigID, third party apps, and API-based integrations that leverage deep data insight to ensure better data compliance, security, and value.

Agile infrastructure

API-centric microservices architecture built to run in a flexible agentless model for on-prem, cloud, hybrid, or multi-cloud deployment.

Support for all your data

Coverage where you need it, at petabyte scale.
- Unstructured files & email
- Structured databases
- NoSQL (including Couchbase)
- Big Data & Data Lakes
- Pipelines (including Kafka & Kinesis)
- Infrastructure-as-a-service (IaaS)
- Analytics (including Databricks)
- Applications (including SAP, SFDC)
- API data streams
Unmatched Data Coverage + Discovery-in-Depth + Insights + Actions

### Data Privacy Apps
- PI / PII Inventory
- DSAR Fulfillment Automation
- Data Processing & Sharing
- Consent Governance
- Privacy Portal

### Data Protection Apps
- Remediation
- Data Access
- Labelling
- Breach Data
- Data Risk

### Data Perspective Apps
- Data Quality
- Data Retention
- Stewardship Self-service
- Advanced Profiling
- Data Lineage

---

**Data Discovery Foundation**

Discover, identify, and classify all of your data, everywhere - with BigID's patented Discovery-in-Depth technology.

- Catalog
- Classify
- Cluster Analysis
- Correlate

Unstructured · Structured · Semi-structured · Big Data · NoSQL · Data Lakes · Data Warehouses · OCR Applications · SAP · Email · Messaging · Mainframe · Data Pipelines · IaaS · SaaS · APIs · Network
