Why Trend Micro Cloud One™?

- **Automated** - Security as code lets your DevOps teams bake security into their build pipeline to release continuously and frequently. With built-in automation, including automated discovery and deployment, quick start templates, and our Automation Center, secure your environment and meet compliance requirements quickly.

- **Flexible** - Builder’s choice. Security for your hybrid cloud, multi-cloud, and multi-service environments, as well as protection for any vintage of application delivery—with broad platform support.

- **All-in-One Solution** - One platform that has the breadth, depth, and innovation required to meet and manage your cloud security needs today, and in the future.

Product overview

Trend Micro Cloud One™, a security services platform for organizations building in the cloud, delivers the broadest and deepest cloud security offering in one solution, enabling you to secure your cloud infrastructure with clarity and simplicity. By considering your cloud projects and objectives holistically, Trend Micro Cloud One™ can provide powerful security, while you leverage all the benefits and efficiencies the cloud offers your business. Comprised of multiple services designed to meet specific cloud security needs, Trend Micro Cloud One™ gives you the flexibility to solve your challenges today, and the innovation to evolve with your cloud services in the future.

Product features

Trend Micro Cloud One™ provides solutions for:

**Cloud Migration**

- Automates the discovery and protection of public, private, and virtual cloud environments, while also protecting the network layer.
- Gain increased visibility and consistent security throughout your cloud environments, with the most security controls and integrations within your existing toolsets.

**DevOps**

- Automated protection for your applications, which can be built into your CI/CD pipeline.
- Identify and resolve security issues sooner, as well as improve delivery time for DevOps teams.

**Containers**

- Delivers cloud-native security optimized to protect and scale across environments, baking security into your CI/CD pipeline.
- Build secure, ship fast, and run anywhere with automated security for your containers from the software-build pipeline to runtime, with container image scanning, as well as protection for your Kubernetes®, and Docker® platform.
Product features (continued)

Serverless

- Provides protection for your serverless applications against exploits, which can harm your systems, data, and business.
- Built for speedy deployment, with minimal impact on development streams and performance, simply add to your app with two lines of code.

Data Center

- Enables the operational efficiency required to support your modern data center.
- Integrating with the fabric of your physical and virtualized environments, Trend Micro Cloud One™ delivers fewer agents and automatic discovery and deployment of security.
- By consolidating security tools with a comprehensive set of capabilities, you can better detect, protect, and respond to vulnerabilities, malware, and unauthorized system changes.

Services

Trend Micro Cloud One™ includes the following services:

<table>
<thead>
<tr>
<th>Service</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Workload Security</td>
<td>Runtime protection for workloads (virtual, physical, cloud, and containers)</td>
</tr>
<tr>
<td>Container Security</td>
<td>Image scanning in your build pipeline</td>
</tr>
<tr>
<td>File Storage Security</td>
<td>Security for image scanning, orchestration, runtime, cloud file, and object storage Services</td>
</tr>
<tr>
<td>Application Security</td>
<td>Security for serverless functions, APIs, and applications</td>
</tr>
<tr>
<td>Network Security</td>
<td>Cloud network layer IPS security</td>
</tr>
<tr>
<td>Conformity</td>
<td>Cloud security and compliance posture management</td>
</tr>
</tbody>
</table>
Differentiators

- Cloud security simplified with Trend Micro Cloud One™, a security services platform for organizations building in the cloud.
- Speed PCI-DSS and regulatory compliance with multiple security controls in one product.
- Defend against malware, and network threats with virtual patching, and Intrusion detection and prevention (IDS/IPS).

How it works

Trend Micro Cloud One™ seamlessly defends your Amazon EC2 instances, AWS Lambda, AWS Fargate, containers, AWS Outposts, Amazon S3 buckets, and your VPC networking, with APIs and integrations into your toolchains, it is security that won't slow you down. With anti-malware, virtual patching and IPS capabilities, protection for Linux workloads, and visibility and monitoring for unplanned or suspicious changes to your infrastructure or applications, we can help you gain immediate visibility into your environment and speed up your compliance requirements.
