Why Barracuda WAF-as-a-Service?

- Easy-to-use, five-step onboarding wizard to ensure your applications are protected in minutes.
- Effective pre-built templates provide complete protection for most used apps.
- Enterprise-proven technology that defends against OWASP Top 10, OWASP Automated Threats to Web Applications, zero-day threats, and more.
- IP reputation protection, including IP geolocation and reputation feeds.
- Fully-featured REST API enables near-limitless integration options for DevOps teams.

Product overview

Barracuda WAF-as-a-Service for Amazon Web Services (AWS) is a full-featured web application security service protecting such security risks, as OWASP Top 10, DDoS, zero-day threats, and more in minutes. You can deploy, configure, and get Barracuda WAF-as-a-Service up and running in just minutes. Pre-built templates protect your applications immediately, and an intuitive interface makes it simple to fine-tune specific policies.

Product features

Barracuda Vulnerability Remediation Service

The Barracuda Vulnerability Remediation Service is built-in and provides automatic vulnerability detection and remediation which can be scheduled, ensuring ongoing protection without any administrative overhead.

Compliance reports

Detailed compliance reports help you easily understand your security status at any given time by having complete visibility into all HTTP/S traffic.

Unmetered DDOS protection

Barracuda WAF-as-a-Service includes unmetered DDoS protection ensuring the availability of your web apps.
How it works

Barracuda WAF-as-a-Service is a cloud delivered solution that enables anyone to add protections against the OWASP Top 10, DDoS, zero-day attacks, and more to their web applications in minutes. It provides the full spectrum of configuration from 1-touch deployment, to complete control.

Differentiators

- **Simplified application security** - comprehensive protection for your web applications in minutes thanks to the simple five-step wizard and numerous pre-built templates for commonly used applications.

- **Complete control over every component** – more advanced users can maintain complete control over fine-tuning specific policies with an intuitive component-based structure and vast library of specific components.

- **Automation** - fully featured REST API and automated vulnerability remediation built-in enables near endless automation options for DevOps and SecOps teams.
Simplified application security for everyone

Remove the complexity of setting up and configuring an appliance or instance. Barracuda WAF-as-a-Service delivers comprehensive protection for your web apps in minutes thanks to its simple five-step wizard, and numerous pre-built templates for commonly used applications.

Complete control over every component

For more advanced users, Barracuda WAF-as-a-Service offers a level of control traditionally reserved only for on-premises and public cloud solutions. Take complete control over every component, and fine-tune specific policies for each applications requirements.
