Key Benefits

- Centralized authentication services allow users to connect in any directory, accessing any app, hosted in any cloud, in any situation.
- Single sign-on (SSO) for employees, partners, and more.
- Multi-factor authentication (MFA) with contextual and adaptive policies.
- Centralized management portal with self-service application programming interface (APIs), templates, and delegated administration capabilities.
- Single source of truth enabled by unlimited directory integrations and bi-directional data synchronization.

Product Overview

Ping Identity's Workforce solution is a fast, simple and an easy identity-as-a-service (IDaaS) platform that enables enterprises to give their users federated access to applications with a single click from a secure, cloud-based dock, accessible from any browser or mobile device. It supports over 1,700 out-of-the box integrations to popular apps, providing rapid time to value for your workforce.

Product Features

Authentication authority

- Federated authentication and single sign-on.
- Unlimited integrations with any custom, on-premises, software-as-a-service (SaaS) or cloud applications such as Zoom, Slack, ZScaler, SAP, Microsoft Active Directory, and more.

Consistent employee experiences

- Customizable one-click access application portal.
- User self-service password resets and device management.

Strengthened security posture

- MFA that integrates everywhere.
- Adaptive authentication policies (location, IP address, geofencing).

Centralized management

- Authentication via administrator API.
- Centralized authentication and SSO operating portal and delegated app administration.
How it works

The Ping Intelligent Identity Platform provides customers, employees and partners with access to cloud, mobile, SaaS, and on-premises applications and APIs, while also managing identity and profile data at scale. Over half of the Fortune 100 choose us for our identity expertise, open standards leadership, and partnership with leading enterprises. We provide flexible options to extend hybrid IT environments and accelerate digital business initiatives with multi-factor authentication, single sign-on, access management, intelligent API security, directory and data governance capabilities.

Differentiators

• Provide your workforce with SSO access to all their applications via an employee dock. Reduce password problems and the volume of helpdesk calls with a consistent authentication experience across all app environments.
• Enable zero trust security with MFA that can be deployed everywhere by leveraging an authentication authority, backed by adaptive and contextual policies.
• Keep pace with business needs rapidly with centralized management, self-service, and delegated administration capabilities.
