AHEAD Start for Commvault Data Protection on AWS

Consulting offer

Data protection readiness assessment on AWS

AHEAD helps you gain visibility into your current data protection environment on Amazon Web Services (AWS) and enables you to accelerate and optimize your Commvault data protection strategy.

Benefits

- **Manage change over time:** Most environments are in an almost constant state of change. Throughout this change, AHEAD helps you adhere to industry and vendor best practices, provides high quality service, and continuously improves application performance. AHEAD's solution helps keep your infrastructure performance and capacity in check with your dynamic business and information needs.
- **Discover and analyze existing backup software and hardware across your separate environments:** AHEAD's solution enables you to discover and analyze backup environments and provide executive summaries and strategic roadmaps.

Customer contribution

- Make key stakeholders available for discovery workshops.
- Provide backup system configuration script execution.
- Fill out environment discovery questionnaire.
- Be available for client stakeholder interviews.

Key activities

Detail your business and IT requirements, goals, expectations, and success parameters associated with the engagement.

Document the existing backup environment. Environmental documentation will be limited to the configuration of the backup system and select resources.

Participate in a series of discussions between the AHEAD team and your subject matter experts about the backup environment for sites in scope.

Gain the necessary tools for data collections across sites in scope.

Develop and document recommendations for improvements to the backup infrastructure, by analyzing several factors.

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.
