Build a collaborative data science platform

Jumpstart consulting offer from Pariveda Solutions

Be adaptive, solve problems, and determine what's next

Work with AWS Premier Consulting Partner, Pariveda Solutions, to build a Domino Data Lab Data Science Platform

Benefits

From this engagement, your organization will gain:

- A vision and comprehensive road map for machine learning (ML) at your organization.
- A central, cloud-based data science platform for tracking all data science activity.
- Established processes that will enable your organization to scale up data science efforts.
- An ROI-based value proposition for at least one predictive application.

Customer contribution

- Identify a sponsor to make project steering decisions
- Participate in a kick-off workshop with Pariveda to identify and prioritize ML opportunities.
- At least 4 hours with data and business subject matter experts to understand data details and meaning.
- At least 2 hours with affected business stakeholders to plan process changes for testing of the platform.

Key activities

In a kick-off workshop, identify and prioritize ML driven opportunities.

Installation and configuration of Domino Data Lab on the client's AWS Account, including account setup for the data science team.

Identify, organize, and store input data for priority ML opportunities on the AWS Platform using Pariveda's DataForge framework.

Pariveda provides support for or executes the research phase for one predictive application, and educates stakeholders about Pariveda's AgileML process.

Pricing breakdown*

Consulting fee: \$90,000

Licenses: \$18,750 for 3 months license (up to 5 users)

Customer ready solutions

"Atlas was very pleased with the outcome of this project. Pariveda did an excellent job understanding the uniqueness of our business and used that knowledge to develop the model."
