Data Warehouse Modernization Jumpstart Package

Transform your data warehouse in weeks, not years

Launch your data warehouse transformation into the cloud with a Proof of Concept (PoC) leveraging a reference architecture, leading solutions from AWS, Tableau, Matillion, and 47Lining experts.

Starter Package Deliverables

- Carry your real data through the flow, enabling your analytics team to see how this cloud architecture is built and operated
- Deliver insights to your business users
- Cost analysis and ROI for full migration and on-going operations
- Operations and cross-collaboration assessment – “as is” & “to be”

Customer Contribution

- Identification of up to 3 sources of 500GB total data for PoC
- Access to 1 operational data source for demonstration of sync
- Requirements for up to 5 dashboards

Key Activities

Ingest data from a variety of on-premises, SaaS, 3rd party, and public data sources to answer your most important business questions

Develop on-going data transformation and sync flows with Matillion

Load data into Amazon Redshift for data warehousing and Amazon RDS for serving performant dashboards

Visualize results with rich dashboards, data exploration, and drill-downs using Tableau

Customer Ready Solutions

Discover secure, scalable solutions that help you achieve your business needs through a combination of AWS services and APN Partners that have attained AWS Competency designations. Based on architectures validated by AWS to accelerate your cloud transformation, you can deploy solutions quickly with AWS Quick Starts and optional Jumpstart consulting offers provided by APN Partners.
