F5's BIG-IP Virtual Edition for intelligent traffic management on AWS

Consulting Offer

Automate and secure your F5 solutions

Modern application development requires a platform that can automatically scale to meet changing demands, without jeopardizing security or efficiency. By utilizing F5 BIG-IP and BIG-IQ, Vandis' DevOps teams help you establish role-based access control, create application and device templates for easy scalability, and automation for your existing third-party configuration management tools on Amazon Web Services (AWS).

Benefits

- Role-based access control: A Vandis cloud solution specialist will recommend and document Role-Based Access Control (RBAC) policies based on the unique requirements of the organization
- Application & device templates: Vandis will create a catalog of templates to streamline the deployment process of new or updated applications
- Automation: Vandis will help integrate F5 BIG-IP Cloud Edition with your existing third-party configuration management tools
- Auto Scale: Vandis will help create, document, and operationalize auto scale application services templates

Customer contribution

- Responsible for any applicable F5 licensing fees

Key activities

Review automation workflows and tools, with a strong focus on configuration management platforms

Review of hybrid architecture

Evaluate existing F5 BIG-IP integration and dependencies

Hook configuration management platform into the F5-BIG-IP APIs

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.
