Oracle e-Business Suite Migration to AWS with clckwrk Consulting Offer

Contact clckwrk to kick off your Oracle e-Business Suite Migration

Running Oracle e-Business Suite in AWS can bring you more agility in your environments, better performance in user transactions and concurrent processing and world class security. Contact clckwrk to use tried and tested best practice and start your migration today.

Benefits

- Use the right components in AWS for migrating your e-Business Suite
- Get an Environment up and running quickly with all the necessary documentation for architecture and migration
- Learn how to manage Oracle license usage on AWS, built right into your design documentation
- Get security right from the start. Templated builds are aligned to AWS 'Well Architected' best practice

Customer Contribution

- Prioritise the migration with your Oracle team
- Define the source environment from your current estate
- Be prepared to allow access for migrating data out of your estate to AWS

Key Activities

Preparation – use the clckwrk quick start Cloud Formation template to build out the AWS infrastructure needed for migration. We'll provide a template design document and migration document that we'll populate together over the coming steps and make into the core knowledge basis for your Oracle migration

Data migration – we work together to select the best way to move your data, then we migrate a complete set of data and applications from your on-premise environment to AWS

Clone to Cloud – we work together to complete the post-clone steps needed to operate Oracle e-Business Suite on AWS. This includes any changes to EC2, EBS and networking components that may be specific to your Oracle implementation

Test Support – before and after you turn the environment over to your user community we work with you to make sure all of that core Oracle functionality is working correctly.

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.
