# Data Warehouse Modernization Jumpstart

## Assess and plan your data warehouse migration to the cloud

### Accelerate your move to the cloud

Kickstart your data warehouse modernisation journey by assessing and trialling a migration with a Minimal Viable Product/MVP.

#### Benefits

- Learn how to run a data warehouse in the cloud using industry best practices
- Optimize your end-to-end data ingestion pipeline by leveraging scalable infrastructure
- Simplify the management of your data warehouse through automation
- Enable your business users to trial with new analytical tooling and services

#### Customer Contribution

- Make key stakeholders available for discovery workshops
- Provide access to an AWS account
- Identify one sample dataset to be migrated as part of the Proof of Concept
- Agree to be a public reference for AWS and Cloudreach

#### Key Activities

Document a high level design that outlines the implementation of your cloud data warehouse solution based on requirements gathered from workshops

Design a migration plan to move your data and input feeds with minimal disruption

Analyse the total cost of ownership for a full migration and AWS running costs based on projected growth rates

Trial the migration with a Minimal Viable Product/MVP data warehouse deployed into your AWS environment

#### Customer Ready Solutions

Discover scalable solutions that help you achieve your business needs through a combination of AWS services and APN Partners that have attained AWS Competency designations. Based on architectures validated by AWS to accelerate your cloud transformation, you can deploy solutions quickly with AWS Quick Starts and optional Jumpstart consulting offers provided by APN Partners.
