

CrisisGo

AWS PARTNER NETWORK (APN) HIGHLIGHT

Who is CrisisGo?

CrisisGo provides highly secure and reliable safety solutions to make sure your community is ready for any emergency. As an Amazon Web Services (AWS) Advanced Technology Partner, we utilize digital safety plans, coordinated alerts, and communication across various devices to cover the full scope of safety—from prevention to response to recovery.

APN Advanced Technology Partner

APN Technology Partners provide hardware, connectivity services, or software solutions that are hosted on, or integrated with, the AWS Cloud.

Digital safety platform

Our digital safety and incident management platform empowers your community to recognize, prepare, address, and review incidents—with speed and reliability you can trust.

Seamless integrations

Integrated safety devices and technologies provide detailed information and precise locations, helping your response teams react faster with a customized action plan.

Threat assessments

The CrisisGo Student Threat Assessment Manager equips your team to develop targeted violence prevention plans, share information, and collaborate quickly to avert emergencies.

CrisisGo connects people, schools, and technology to ensure everyone has what they need to be safer, using the AWS Cloud for maximum dependability and scalability for our clients.

"I would say that there wouldn't be a program that would have helped any better. [CrisisGo] was immediate. There was no PA system; there's no quick text or phone call to everyone. It was the quickest method that we could utilize and we're grateful for it."

Alan Bosker
