

eThink

AWS PARTNER NETWORK (APN) HIGHLIGHT

Who is eThink?

eThink collaborates with Amazon Web Services (AWS) to provide fully managed eLearning solutions, including hosting, implementation, and management services for Moodle and Totara learning management systems (LMS) on the AWS Cloud. We understand the importance of reliable support, and our average ticket response time of less than one hour has allowed us to retain 99 percent of our clients.

APN Advanced Technology Partner

APN Technology Partners provide hardware, connectivity services, or software solutions that are hosted on, or integrated with, the AWS Cloud.

Unlimited LMS support model

With eThink's fully managed eLearning solution, we take care of the heavy lifting when it comes to the LMS—which includes unlimited modules, storage, and support.

AWS collaboration

eThink is working with AWS to deliver worry-free hosting in a secure, scalable environment, with separate code bases for maximum flexibility.

Real-time SIS integration

Our fully automated integration allows for automatic course creation, enrollment sync, and more—no matter which student information system you use.

eThink

eThink's world-class LMS services, along with our relationship with AWS, empowers our clients to maximize their learning initiatives and achieve their organization's eLearning goals.

"eThink has made our management of the LMS much easier. We get to update at a schedule that works best for us, which allows us to add new features for our faculty and students at a much faster pace. eThink's support is quick and informed, and they share our sense of urgency to resolve issues. Our LMS is better than it has been at any point in the past."
