

Workday deploys AWS Backup for Compliance

Challenge

As Workday prepared to launch its Workday Extend offering for app creation, the team sought out a robust backup solution that could not only meet but exceed the demands of partners and customers. However, the prospect of creating complex scripts to manage backups was daunting and time-consuming.

Solution

Workday chose AWS Backup for its ability to meet complex security and compliance measures required by many large organizations across industries.

Benefits

- Assurance of meeting security and compliance requirements
- Simplifies customer audits
- Allows developers to focus on enhancing their products with exciting new features
- Reduces costs

Company: Workday

Industry: Software

Country: USA

Employees: ~12,500

About Workday

Workday is a leading provider of enterprise cloud applications for finance and human resources, helping customers adapt and thrive in a changing world. Workday applications for financial management, human resources, planning, spend management, and analytics have been adopted by thousands of organizations around the world and across industries—from medium-sized businesses to more than 45 percent of the Fortune 500.

“

AWS Backup centralizes all of our backup infrastructure in one place, freeing up our developers' time so they can focus on building and enhancing apps.

”

Paul O'Flynn, Principal DevOps Engineer – Workday
