Klarna Bank AB

# Agenda

Current State & issues with ML value creation

Scale ML value creation by enabling Analyst

Introduction to Amazon SageMaker Canvas

SageMaker Canvas Demo

Customer showcase: Klarna Bank AB

How to get started with Canvas

# ML is powerful

## Predictive maintenance

Manufacturing,  
Automotive, IoT

## Demand forecasting

Retail, Consumer  
Goods, Manufacturing

## Fraud detection

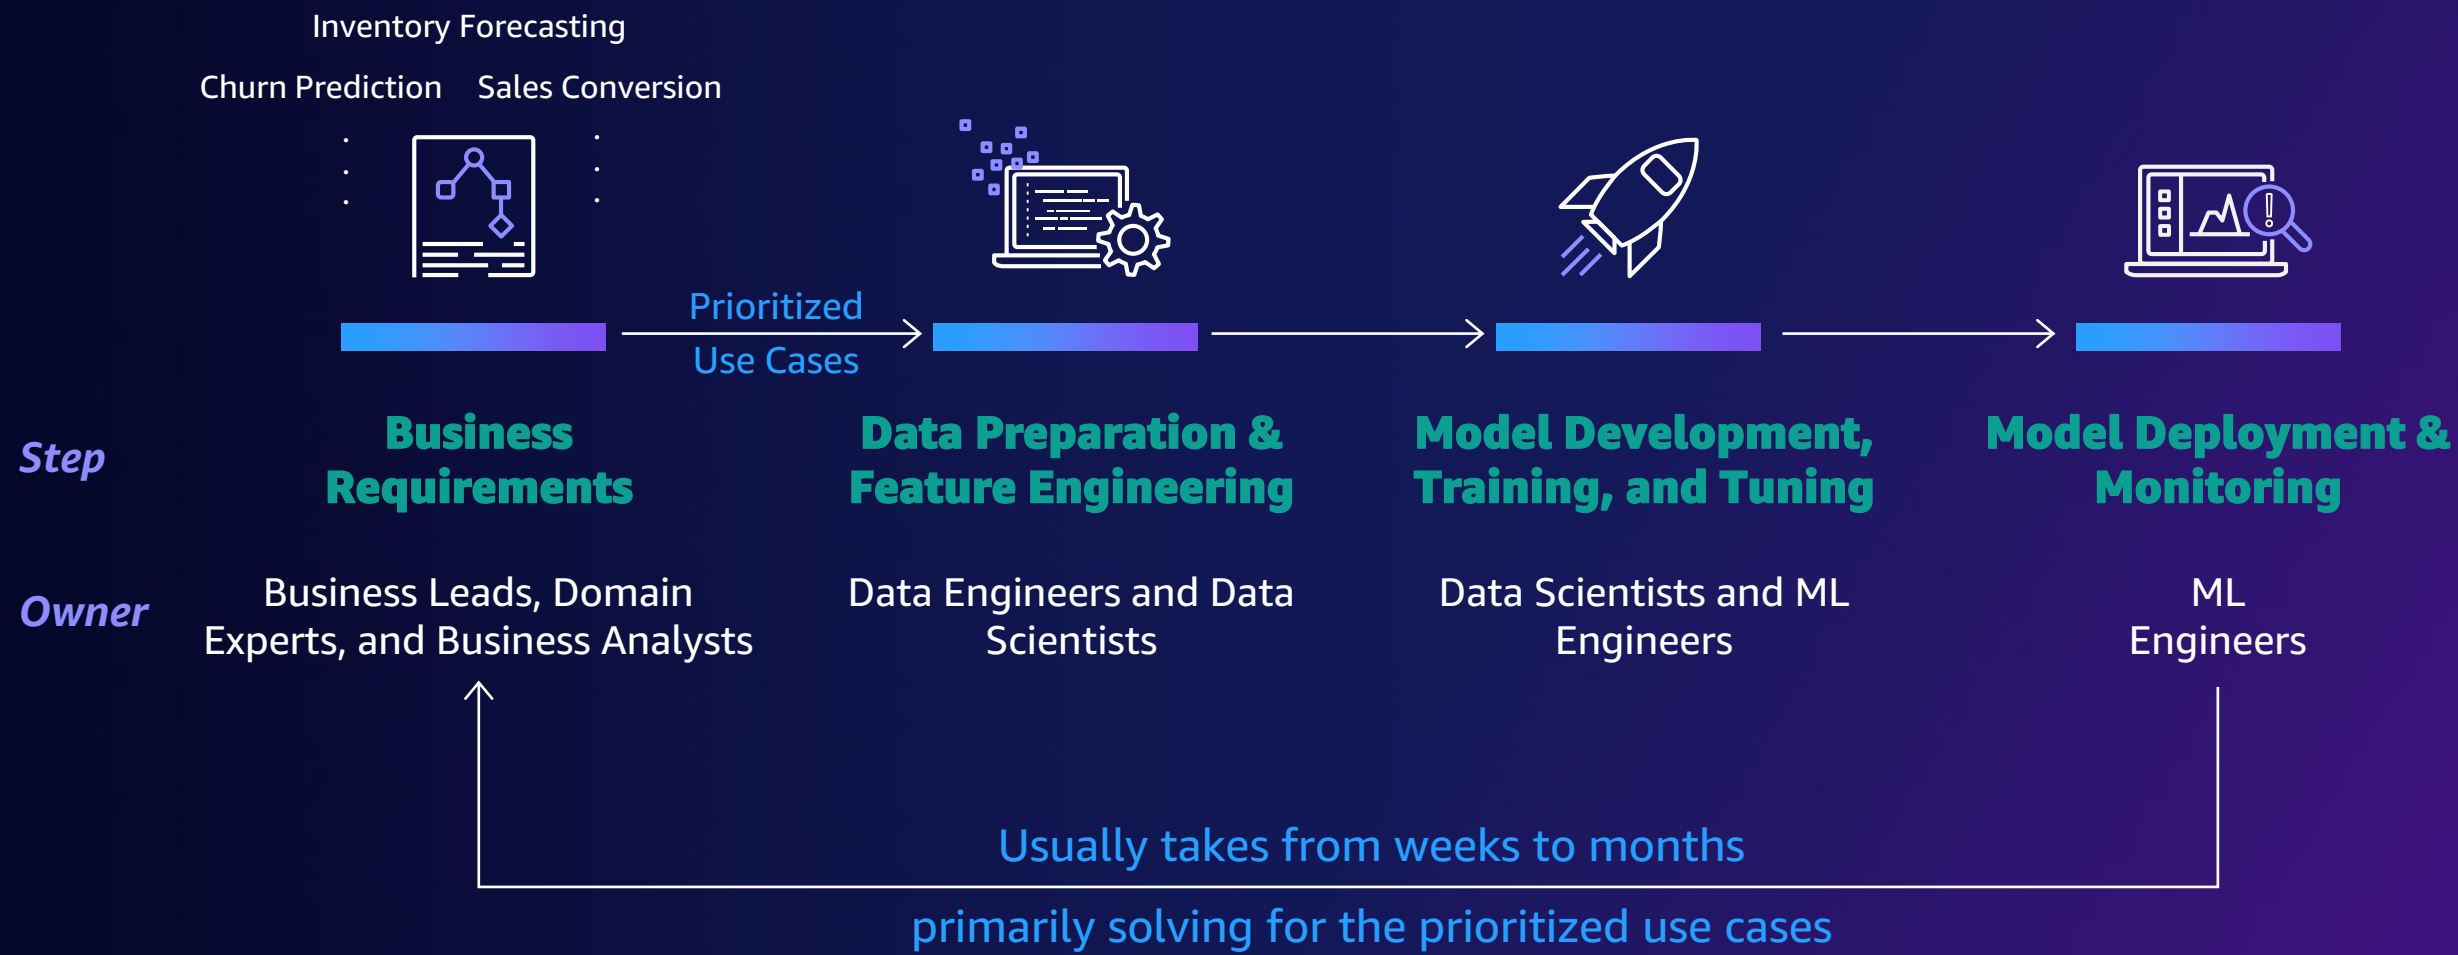

Financial Services,  
Online Retail

## Credit risk prediction

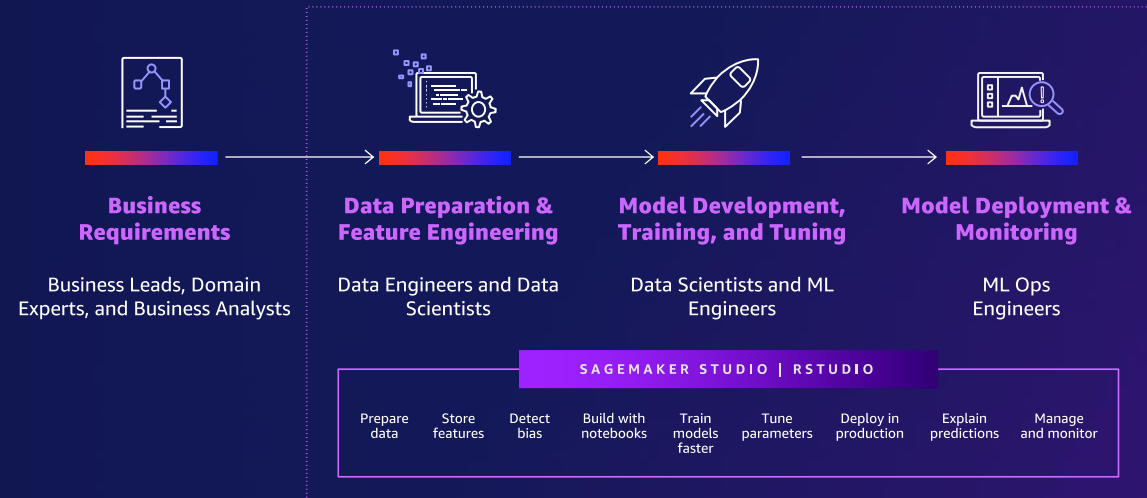

Financial Services,  
Retail

# How ML Drives Value Creation Today

# How Can You Scale ML Value Creation?

## 1 Enhance ML Team Productivity

## 2 Expand Your ML Development Team

**+74%** annual compound growth in past 4 years

**2x** the demand growth of any other emerging job role

## 3 Democratize ML Innovation

**Business analyst require a different set of tools to use ML**

# Challenges Analysts Face in Building ML

**Analysts lack deep ML expertise, and learning curve is steep**

**Business needs explainability and validation from experts**

**Available no-code ML tools tend to lack transparency and have upfront fees**

# Our mission at AWS

---

Put machine learning in the hands of every  
developer, data scientist, and business user

# Amazon SageMaker Canvas

# No ML experience required

Amazon SageMaker Canvas expands access to ML by providing business analysts with a **visual point-and-click interface**, allowing you to generate ML predictions on your own

# Use Amazon SageMaker Canvas to prepare data for ML modeling and generate ML predictions

Can quickly **connect to and access data** from disparate sources

Leverages powerful AutoML technology to automatically **train and build models** based on your dataset

Identifies the best model based on your dataset to **generate single or bulk predictions**

Integrates with SageMaker Studio, making it easy to **share models** with data scientists

# Amazon SageMaker Canvas workflow

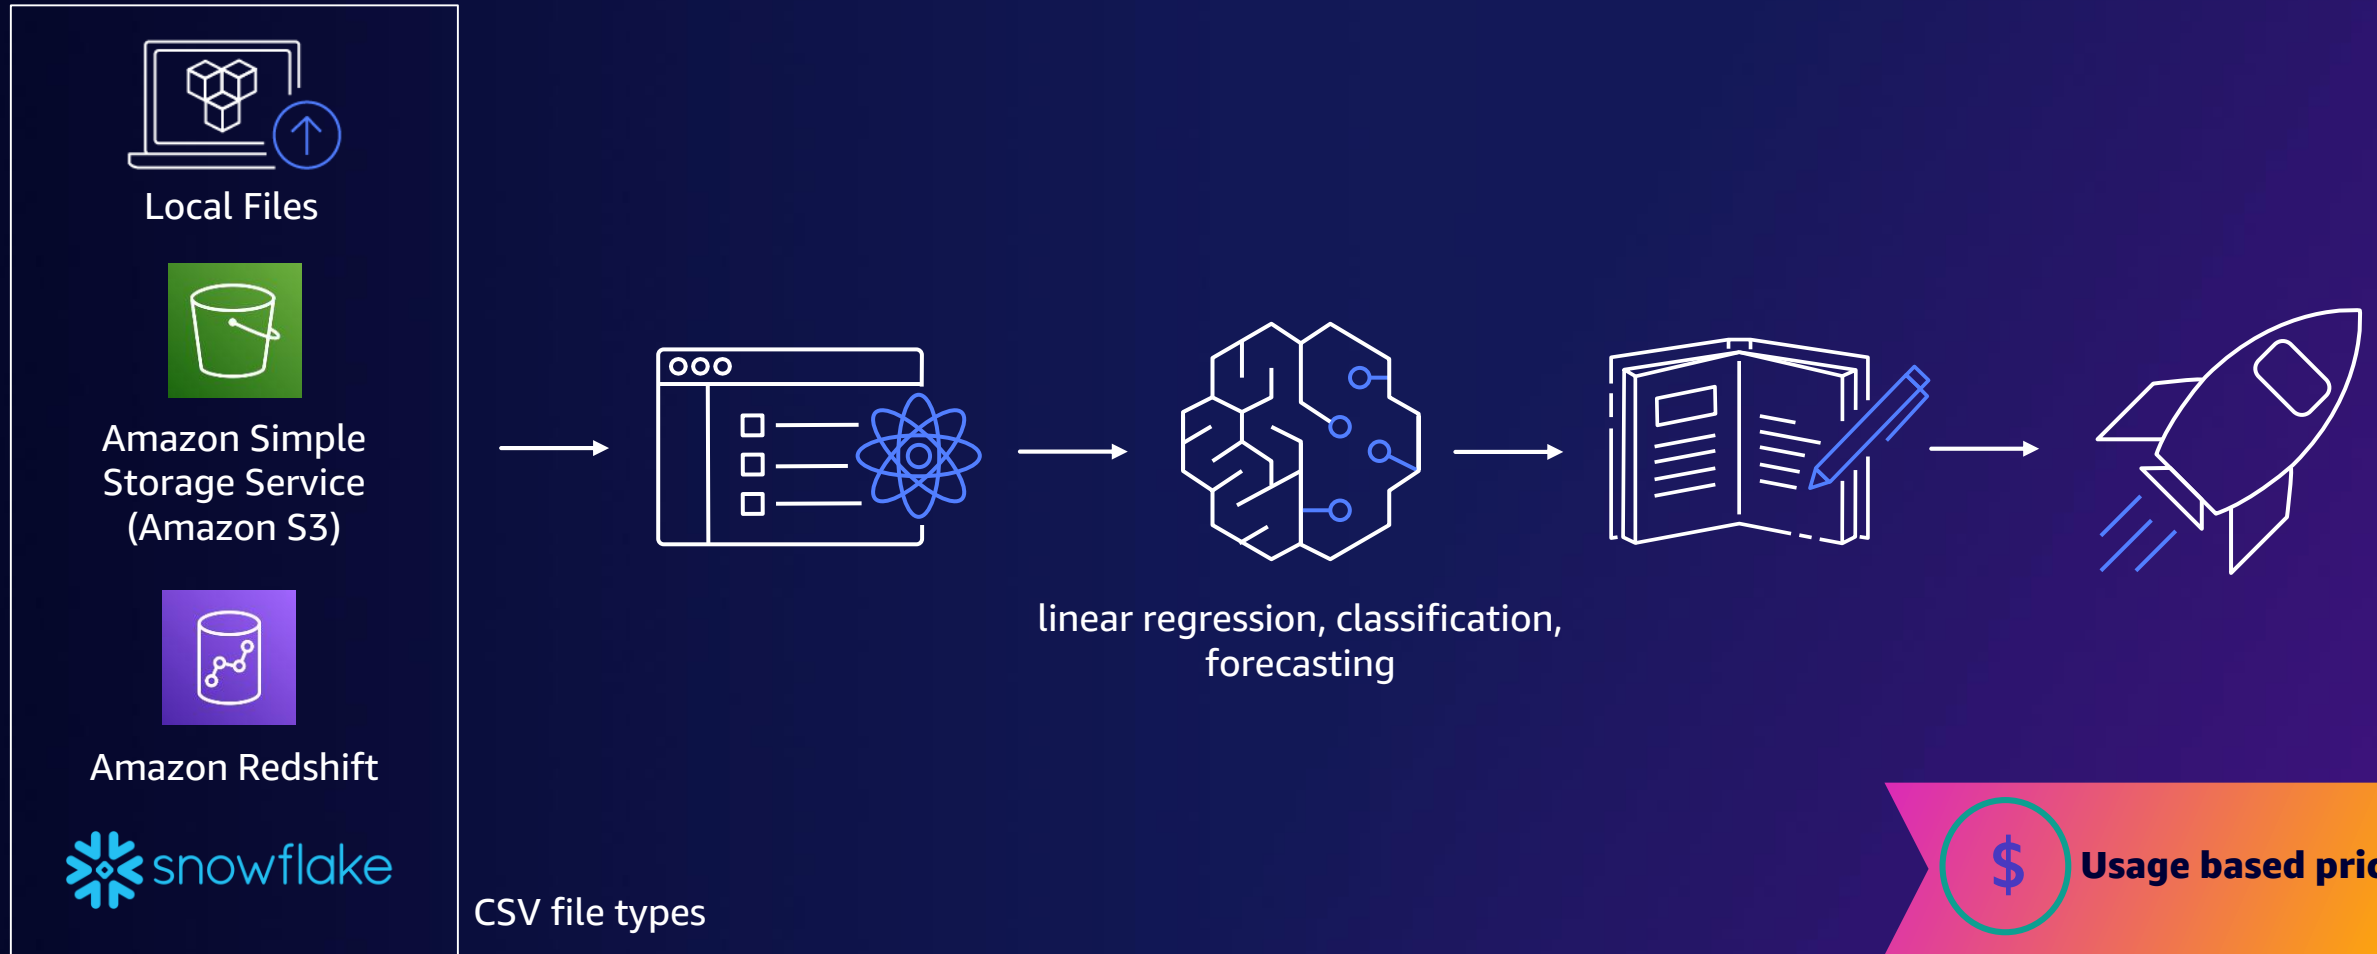

Choose data source(s)

Prepare the Data

Build Model

Analyze Results

Make Predictions

Usage based pricing

# Demo – Product delivery on time

# Will my package arrive on time?

Based on previous shipping logs and product information...

Is it possible to predict if my package will arrive on time?

# Why Canvas

1

## Users and Growth

Number of Analysts vs Data Scientists  
Speed to market

3

## Model Explanations

Impact of features  
Model Interpretation  
Share notebooks with Data Scientists  
Batch and Single Predictions

2

## Data Cleaning

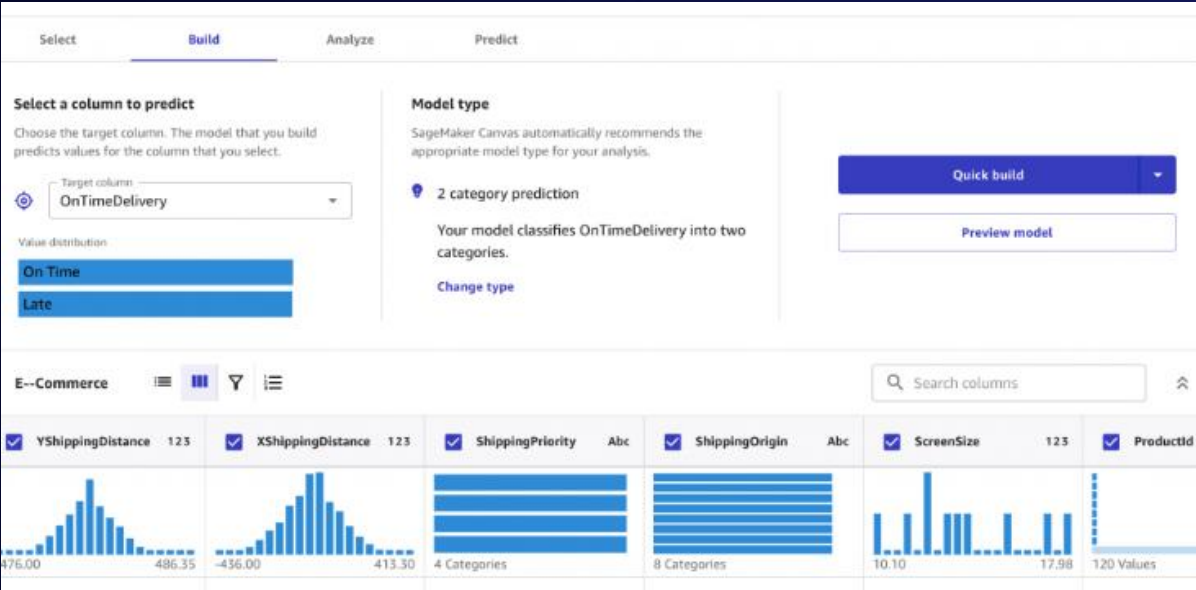

Fast Exploration of Data Sets  
Data Joins possible without code  
Removal of columns

4

## Added Benefits

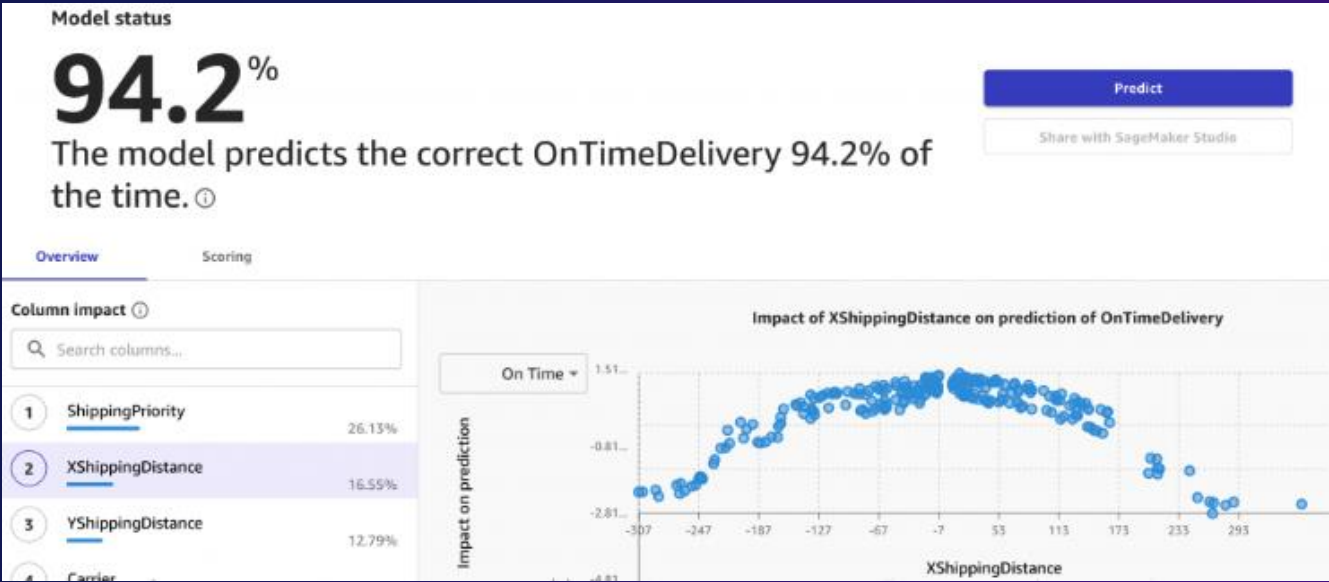

AutoML Variations  
Hyperparameter Tuning
