Bluescape

The next best thing to being in the same room with your team

Why Bluescape?

Unite distributed teams
• All your collected knowledge, content, and data is stored in one easily accessible workspace.

Conduct fewer, better meetings
• Reduce the hassles of meeting preparation and follow-ups by reviewing work, tracking actions, and providing updates through a shared workspace.

Deliver faster, more confident decisions
• With your content organized in front of you, it’s easier to facilitate team discussions and gain alignment on important decisions.

Product overview

Bluescape is a visual collaboration solution for effortless hybrid working. It’s the easiest way to share knowledge between people, even when they’re physically apart. Bluescape lets you virtually gather around your content to see both the big picture and every small detail. All in one place.

Product features

Infinite Canvas
Create, share, and collaborate on your work in secure, virtual workspaces from any device, anywhere.

Online Whiteboard
Unleash your creativity and visualize your ideas with sticky notes and drawing and diagramming tools.

Rich Content Sharing
Upload documents, graphics, photos, and videos, or share web pages and links from cloud storage providers.

Canvases and Templates
Organize your content with canvases. Customize or create your own templates to visualize workflows.

Video Conferencing
Schedule or start instant meetings in Bluescape or use Zoom and Webex to virtually connect with your team.

Present and Review
Deliver full-screen presentations and add annotations, sticky notes, and comments to share feedback.
How it works

Bluescape provides a more efficient and productive way to work, while relieving the frustrations of remote collaboration. By tapping into all the features Bluescape has to offer, you’ll save time and effort, and increase team engagement, alignment, and trust.

Work with a wider range of file types

Applications, documents, video, and web links; you can now bring them all together and view them side-by-side for better collaboration in one dynamic workspace.

Any Device, Anywhere

Tap into a multimodal experience through just about any device, located anywhere—smartphones, tablets, laptops, existing conference room monitors, and of course, giant touchscreen walls.

BYOT (Bring your own tools)

You’re covered when it comes to integrations. Box, Google Drive, and Adobe CC, Dropbox? You bet. Want to integrate industry-specific applications or proprietary tools? Our APIs are ready for your tools, on your terms.
What our customers are saying

“Use of Bluescape equates to 100 minutes of time savings per day or about a half day saved in labor hours per week or 2 days per month.”

- Mark Dalton, Logistics Planning Manager, Haworth
