Scale your Automation with Automation Success Platform, SaaS Offering on AWS

Challenges
Operational inefficiencies and poor employee/customer experience

Manual, mundane, tedious, time consuming, error prone work is preventing businesses, governments and institutions from being efficient, productive, profitable and innovative while negatively impacting employee morale.

Automation Anywhere Solution
Accelerate your business with a digital workforce

Streamline workflows, reduce costs, and make automating even easier when you combine the Automation Success Platform with Amazon Web Services (AWS) global cloud infrastructure.

Benefits
Accelerate Automation on the Cloud-Native AI Powered Platform

- **Fast Innovation and Scale**
  Empower citizen and professional developers to quickly automate with innovation across four releases a year while scaling to meet the needs of your business.

- **Trusted Security and Resiliency**
  Confidently automate on a compliant, resilient and trusted platform with 24x7 security operations teams providing 99.9%+ uptime.

- **Flexible Deployments and Integrations**
  Choose the deployment option allows you to adopt at your pace. Integrate with best-of-breed technologies to expand platform capabilities.

WebPT®

Case Study: WebPT

**Challenges**
In 2018, WebPT acquired BMS Practice Solutions to bring a comprehensive solution to therapy practices of all sizes. One last hurdle was transferring customer data, housed in BMS’s legacy electronic medical record (EMR) system, into its own EMR. Switching EMRs is a notoriously tedious undertaking, requiring a lot of time to replicate simple tasks. Although it could be done manually, due to the sheer project other solutions were considered.

**Solution**
Since WebPT is fully cloud-based and serves a highly-regulated industry, the company required a secure, web-based solution that would not only streamline employee workflows but also deliver a better customer experience by eliminating the strain on resources that often comes with switching EMRs. Automation Anywhere’s cloud-native end-to-end intelligent automation platform was the clear choice.

**Results**
WebPT deployed Automation 360 Cloud on AWS to power their cloud-based infrastructure. AWS provides elasticity, agility, and ease of use by intelligently autoscaling workloads for cost-effective use of cloud infrastructure.
- 5x Increase in data processing
- $700,000 Saved in labor costs
- 15,000 In-network customer records managed
- 24 Bots in production in five months

Features
Accelerate your business with a digital workforce with the most innovative intelligent automation platform deployed on AWS.

- **RPA** - automate any process;
- **AARI** - your helpful automation co-pilot;
- **Bot Insight** - Analyze and optimize processes;
- **Document Automation** - transform information into data;
- **CoE Manager** - measure success, chart automation paths and the engage workforce.
