# AWS Migration Hub Strategy Recommendations

Easily identify migration & modernization pathways

.NET

What

Part of AWS Migration Hub, Strategy Recommendations (MHSR) analyzes your servers, application source-code, and databases to provide prescriptive modernization recommendations.

Why

✓ Identify the best-suited option
✓ Portfolio-wide recommendations
✓ Understand how to migrate & modernize
✓ Find the low-hanging fruit
✓ Make informed decisions

How

1

Configure Data Sources
Add application data through an agentless app data collector or app data import.

2

Add Preferences
Answer a few questions about your business preferences, such as goals.

3

Receive Recommendations
Receive AWS recommendations for the migration and modernization of your applications.

★ **Find the Low-Hanging Fruit**
MHSR identifies apps you can easily modernize as you migrate, with minimal effort, using existing AWS and partner tools.

★ **Understand How to Migrate and/or Modernize**
MHSR helps you understand the effort and the tools you can use to automate.
