

## Here at AWS \_ Season 1 Trailer

Speakers: Geetha Annamalai & Constance Souchet

**Geetha:** Hi, I'm Geetha.

**Constance:** And I'm Constance.

**Geetha:** And we're the hosts of Here at AWS, a new podcast by Amazon Web Services, the world's largest cloud provider.

**Constance:** AWS is a big company, isn't it Geetha?

**Geetha:** Absolutely. People say to me, "Geetha, that company is huge. It must be so overwhelming to work there."

**Constance:** And this is what I thought too, but then when you are in it, you'll realise it actually operates in small teams, a little bit like startups. It's a super collaborative space to work in.

**Geetha:** With innovation at the heart of everything we do, AWS delivers services from infrastructure technology to emerging technologies like machine learning and artificial intelligence.

**Constance:** There are so many exciting projects all happening at the same time in EMEA, which is Europe, Middle East, and Africa. All these projects have a real-world impact, and behind every project is a person.

**Geetha:** So, in our new podcast, Here at AWS, we're going to be talking to the people at the heart of this company. We're going to be looking at who makes this place tick, diving deep into how they got to where they are today.

**Constance:** In this first season, you'll hear great stories all about people finding their pathway with AWS. We'll be looking at AWS as a supportive and inclusive environment for everyone.

You'll hear about great mentors, community-led affinity groups, and other programs that propel our employees to thrilling new heights up in the clouds.

**Geetha:** So, subscribe wherever you listen to your podcast and join us on Here at AWS.
