# Who is Unqork?

## ENTERPRISE-GRADE

Modern, highly-secure, single-tenant platform engineered for mission-critical applications

## NO-CODE

Completely visual development experience with no coding or scripting required

## INTERNATIONAL

15+ countries deployed across the Americas, Europe, and Asia

## FASTER AND LOWER COST

At least 3X faster to market and 70% reduced maintenance costs

Clients are deploying complex applications to production in weeks/months rather than years

## INCREASED BUSINESS AGILITY & RISK MGT.

Rapidly change applications as business context evolves

Enhance competitive advantage with continued evolution while maintaining data lineage

## IP OWNERSHIP

Clients own their IP, business rules, and logic

Unqork does not have access to client production environments

BACKED BY

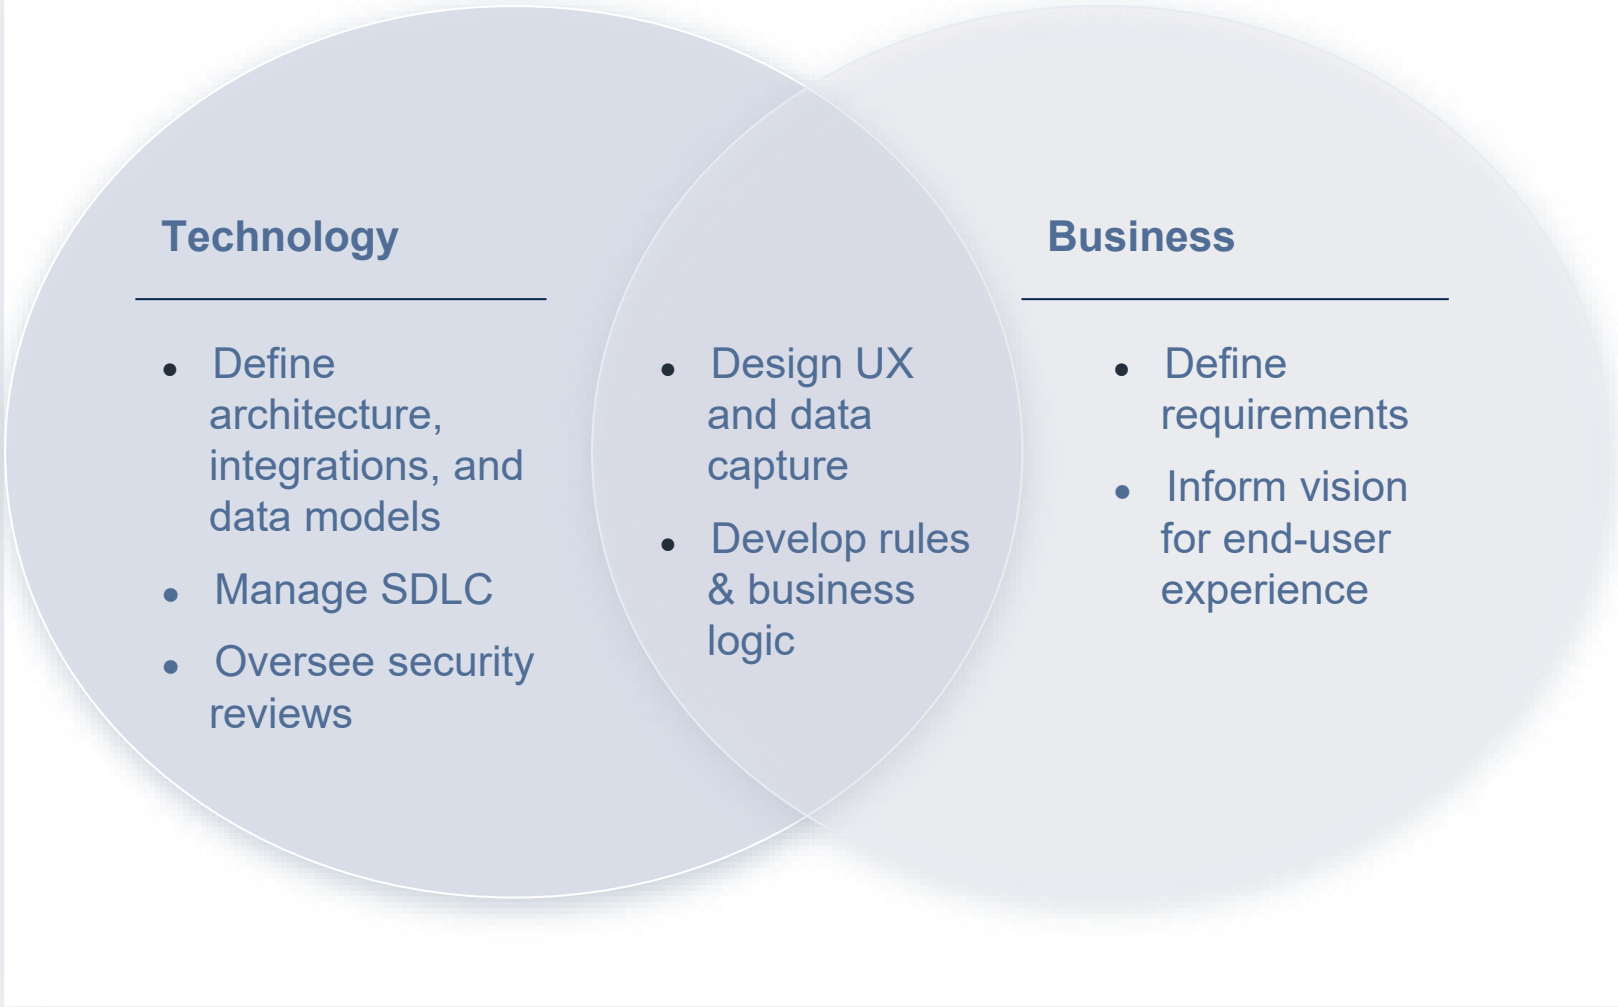

BlackRock. capitalG Goldman Sachs

INDUSTRY EXPERTISE

Extensive Fortune 500 clients

CVS Health. BlackRock. J.P.Morgan

# Our clients bring applications to market faster as we enable IT to more effectively partner with business

## Results

**Accelerated time to market** (weeks instead of months or years)

**Faster iteration** after applications are launched

**Greater business agility**, with faster response to market dynamics

# The benefits & ROI of embracing codeless

It's highly transparent, portable, and upgradable

## Lower cost of maintenance

Ownership costs decrease over time

65% lower total cost of ownership

**Decreased devs per project**

**Decreased time per project**

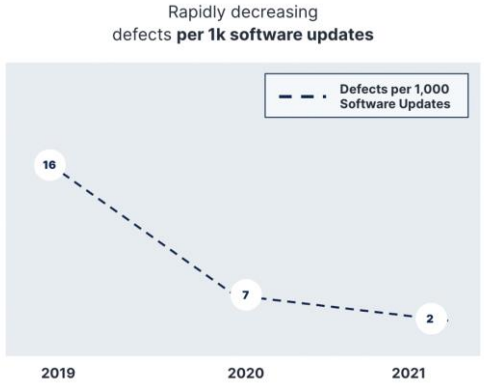

**Decreased number of tools**

## Less code and less bugs

Consistently increasing developer productivity by up to 10x

Build with 600x fewer bugs

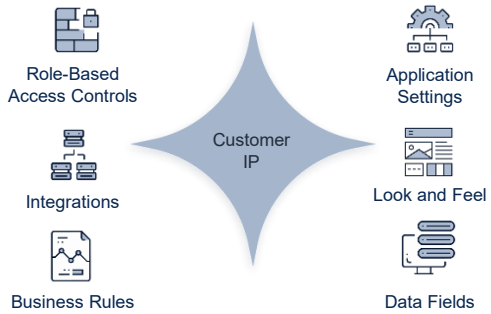

Launch new applications 3x faster

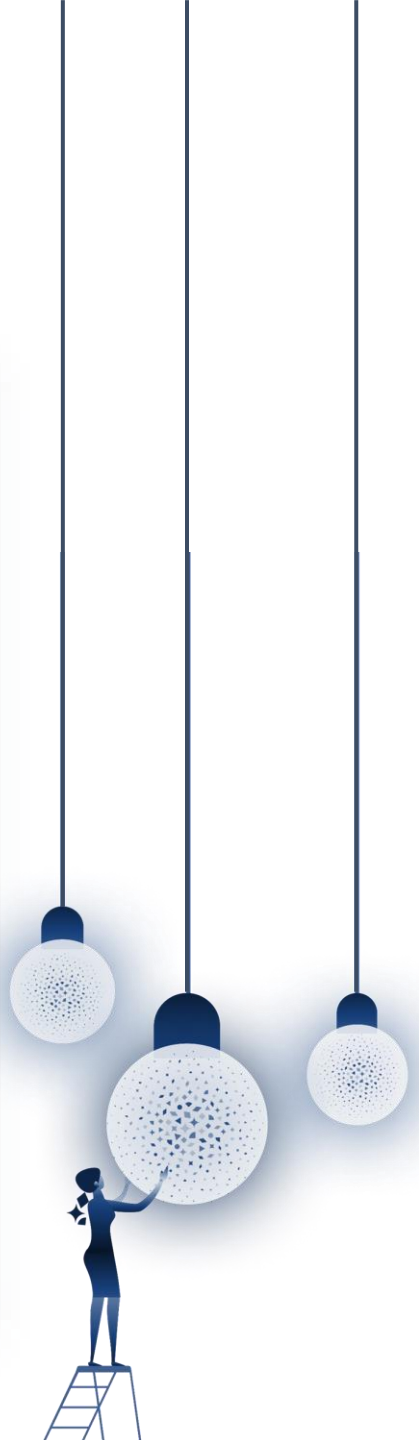

## Open standard

Customer IP is transparent, portable and upgradable

Deploy and run in cloud-agnostic, highly performant, and compliant environment

# How Goldman Sachs innovates across their organization using Unqork's codeless platform

**Challenge**

Goldman Sachs aimed to build an application to enforce better governance for future vendor software acquisition. This application would have a large infrastructure footprint across the firm and would act as a gatekeeper for this process.

**Result**

Designed, built, and launched a fully digital and integrated vendor software acquisition product acceleration portal, replacing a 100% manual process.

- Increased transparency and reporting into engineering's software acquisition spend and reduced costs
- Designed and deployed simple workflows with agility, making control process implementation more successful

**What's next for Goldman Sachs in their digital journey using a no-code platform like Unqork?**

# Thank you!
