Every Breach Has Two Things In Common

- A Human Error for Initial Infiltration
- An Attempt to Pivot to Maximize Infiltration

Teleport Case Study

“We love Teleport's security model and ease of use."

Luke Christopherson,

Software Engineer at Doordash.

Challenge

- Fast growing team and infrastructure footprint
- Heterogeneous cloud environment with servers, databases and Kubernetes
- Difficulty scaling access with homegrown solution

Solution

- The Teleport Access plane consolidates access for all engineers and infrastructure resources.

Impact

- Improved security with granular RBAC, session recordings
- Improved developer productivity with infrastructure SSO and Just-in-time access
- Increased focus on core business without homegrown solution to maintain
