Time-series
data is everywhere.

Change
is constant.

Time-series data
is unique and challenging.

It arrives in time order. It’s relentless.

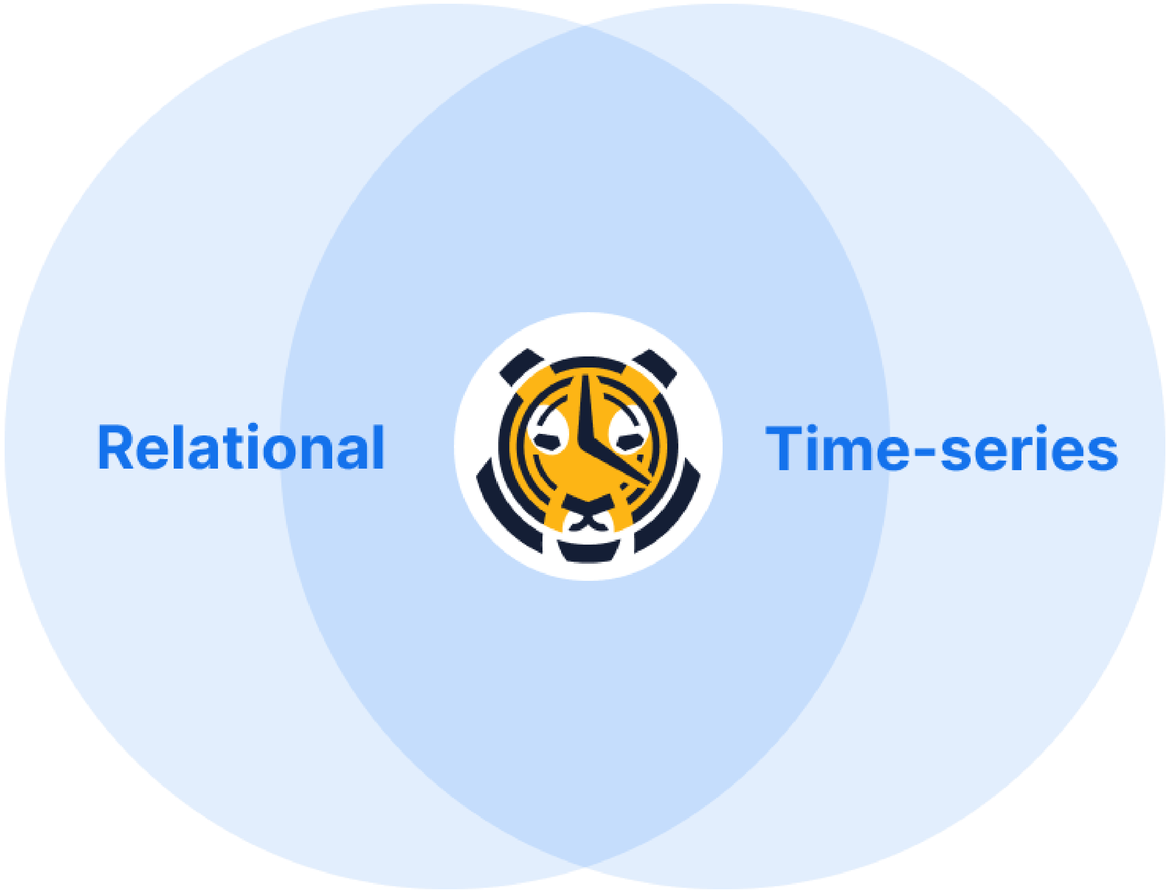

It’s mostly INSERTS.

Time is part of the primary key.

It’s usually queried by time.

Timescale is Postgres with time-series superpowers.

Relational
Time-series

Timescale Cloud.

Performs at scale.

Is cost-efficient.

Saves you time.

Cost-efficiency

- Best-in-class compression
- Automated data lifecycle

Performance at scale

- Hypertables and query planner improvements
- Continuous aggregates
- Multi-node
- Botomless storage

Time Savings

- Built-in time-series hyperfunctions
- Integrated in-database scheduler
- Built-in technical consultancy and support

It's just PostgreSQL

- Query via SQL
- Inherits rock-solid stability
- Vibrant ecosystem
- Interoperable with almost anything

Get started today.
