Customer references

Liberty Mutual uses AWS ML to develop natural language-driven conversational apps to allow customer service agents to respond to customer requests with real-time and contextual intelligence, improving response time and quality of service

Meaningful
customer interactions

C-SPAN uses AWS ML to automatically index video news footage for search. C-SPAN reduced indexing time per video from 1 hour to 20 minutes and uploaded 97,000 images in under 2 hours.

Scaling video
indexing

Domino's uses AWS ML to customize and scale relevant marketing communications to customers based on time, context, and content, thereby improving and enhancing their experience with the Domino's brand

Personalizing
customer experiences

Amazon Rekognition

Deep learning–based image and video analysis service

Object, scene, and activity detection

Face recognition

Unsafe image detection

Celebrity recognition

Facial analysis

Pathing

Text in image

Real-time live stream

Amazon Transcribe

Automatic speech recognition

Support for both
regular and telephony
audio

Amazon S3

S3 integration

Time stamps and
confidence scores

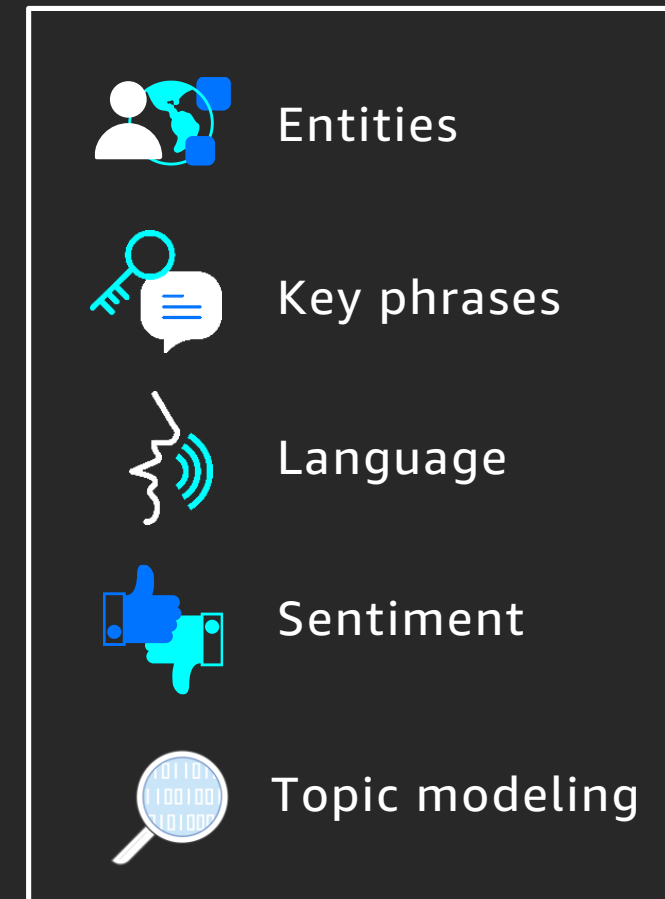

Punctuation

English and Spanish
with more to come

Amazon Comprehend

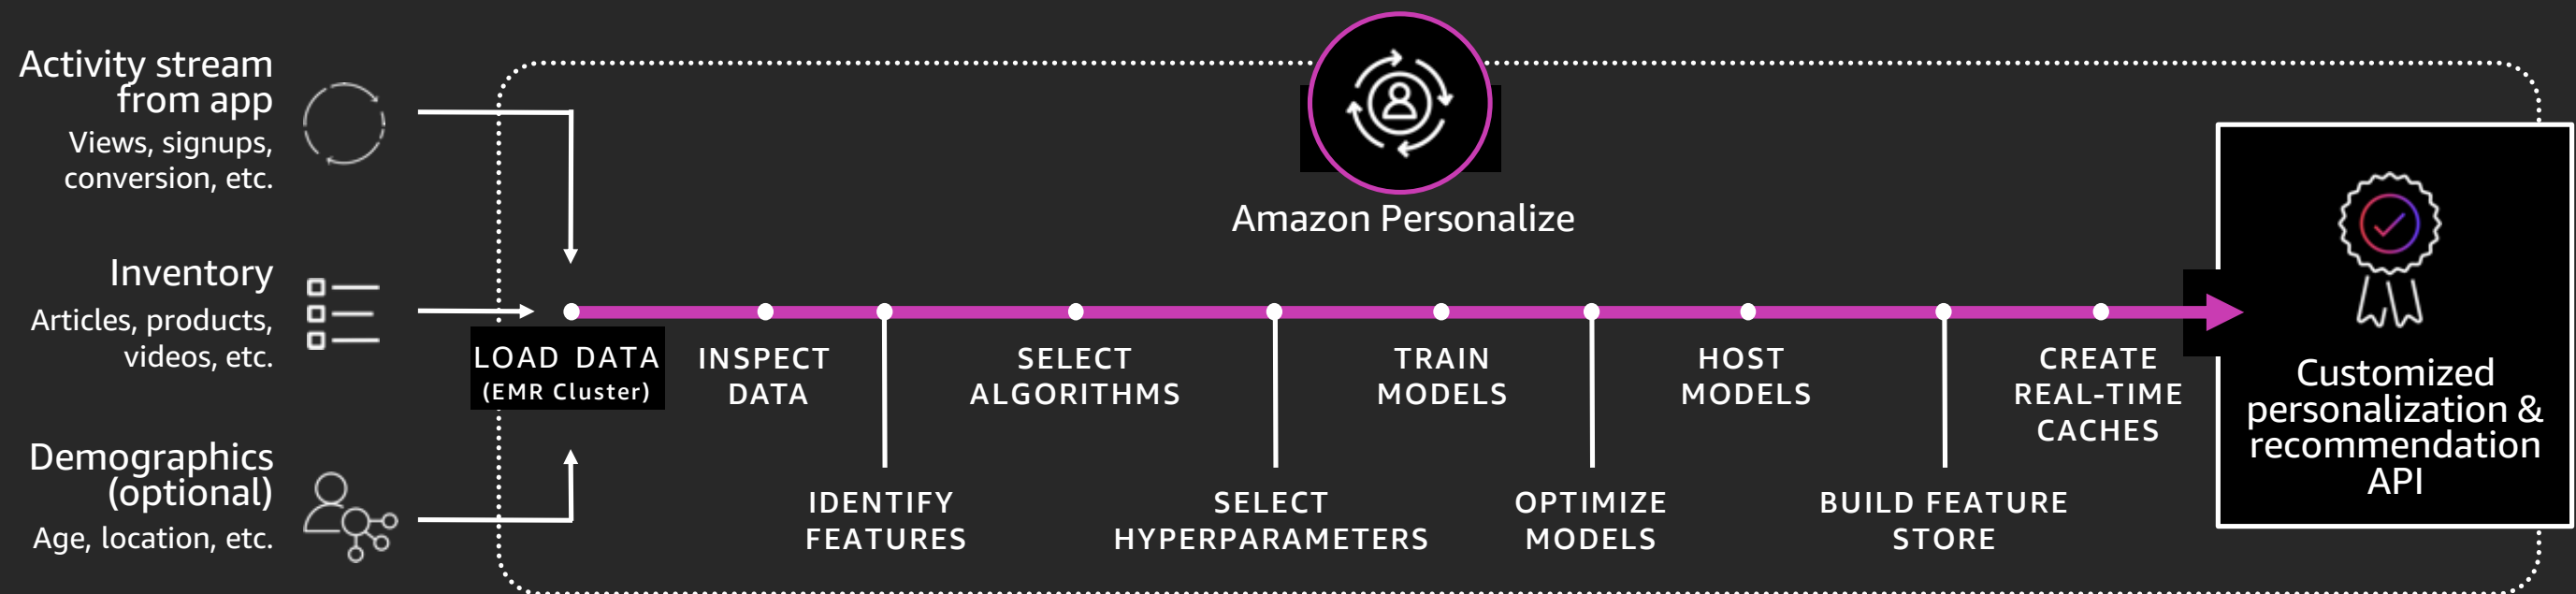

Discover insights and relationships
in text

A fully managed and continuously trained service that discovers insights and relationships in text

Amazon Personalize

Real-time personalization and recommendation service, based on the same technology used at Amazon.com

Fully managed by Amazon Personalize

Amazon Textract

Extract text and data from virtually any document

Extract data quickly
and accurately

Eliminate
manual effort

Lower document
processing costs

KEY FEATURES

Optical Character
Recognition (OCR)

Key-value pair
