Toolchain complexity slows down DevOps initiatives

| Manage	Plan	Create	Verify	Package	Secure	Release	Configure	Monitor	Defend
COLLABNET VERSIONONE	JIRA	GitHub	Jenkins	JFrog Artifactory	snyk		p	New Relic	Symantec
VERSIONONE	REDMINE flexible project management	Atlassian Bitbucket	Travis CI	Sonatype Nexus	sonarqube	XL DEPLOY	CHEF	Nagios	splunk

Are you paying the Toolchain Tax?

Time and cost to **acquire** point tools

Time and cost to **integrate** all of these tools

Time and cost to **train users** on many tools

User **context switching** between all of these tools

Time and cost to **administer** all of these tools

A complete DevOps platform as a single application

Manage	Plan	Create	Verify	Package	Secure	Release	Configure	Monitor	Defend
Since 2016	Since 2011	Since 2011	Since 2012	Since 2016	Since 2017	Since 2016	Since 2018	Since 2016	Since 2019
Cycle Analytics	Kanban Boards	Source Code Management	Continuous Integration (CI)	Container Registry	SAST	Continuous Delivery (CD)	Auto DevOps	Metrics	WAF
DevOps Score	Project Management	Code Review	Code Quality	Maven Repository	DAST	Release Orchestration	Kubernetes Configuration	Logging	Roadmap:
Audit Management	Agile Portfolio Management	Wiki	Performance Testing	NPM Registry	Dependency Scanning	Pages	ChatOps	Cluster Monitoring	Threat Detection
Authentication and Authorization	Service Desk	Snippets			Container Scanning	Review Apps	Serverless		Container Network Security
		Web IDE			License Management	Incremental Rollout			RASP
						Feature Flags			UEBA
									Storage Security
									DLP

GitLab makes it easy to do DevOps on Amazon Elastic Container Services for Kubernetes (Amazon EKS)
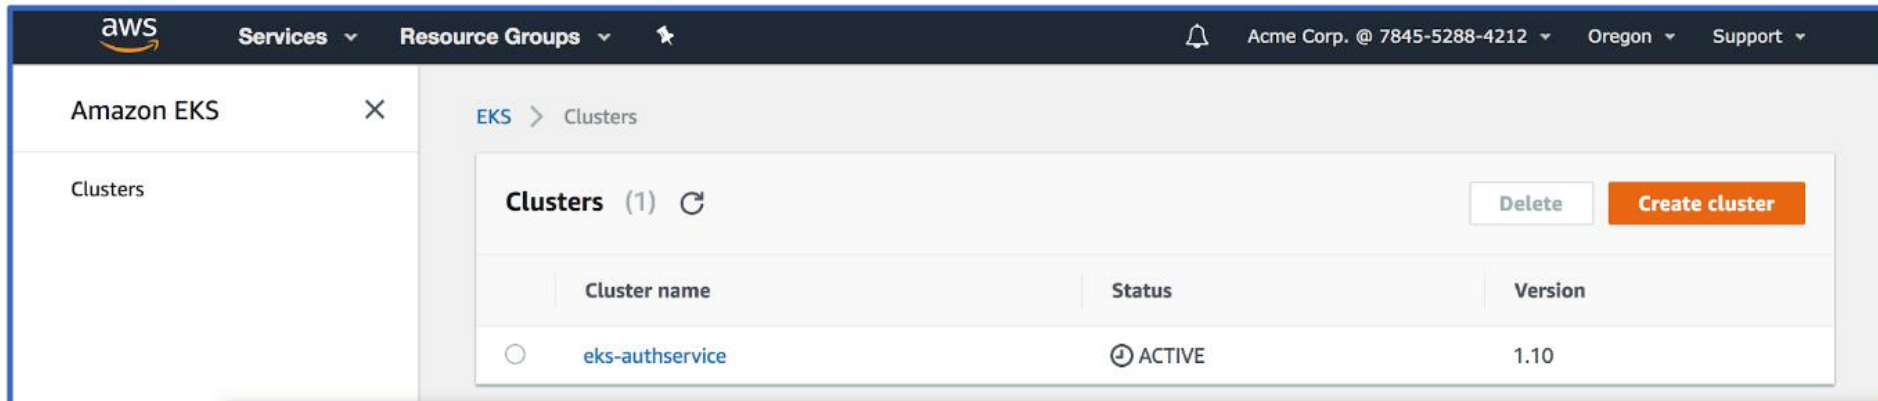

Enterprise customer adoption across verticals

Networking and Telecom

Media and Entertainment

Government

Consumer / Retail

Industrials

Software

Business and Financial Services

Hardware

GitLab's platform helps Ticketmaster deliver higher-quality features to fans more quickly and more consistently

GitLab simplifies ESA's DevOps toolchain and allows team to cross borders, increase cooperation and reshape working culture

GitLab removes toolchain complexity and accelerates DevOps adoption, shortening release cycles from once every 1-2 weeks to once every few minutes

GitLab streamlines Glympse's development processes improving compliance, security scanning and deploy time

GitLab quickly became the backbone of Worldline's development environment, improving code review by 120x

GitLab's open-source platform provides a unified CI / CD system, improves collaboration, and allows for interoperability across multiple cloud providers

A complete DevOps platform as a single application

Auto DevOps
