

AWS DeepRacer Safety and Compliance Information

Use Responsibly. Before using AWS DeepRacer device and its accessories, such as the adaptors (the "Product"), read all instructions and safety information. While using the Product, follow all instructions and heed all warnings. Keep this document for reference.

SAFETY PRECAUTIONS – CARE AND USE

FAILING TO FOLLOW THESE SAFETY INSTRUCTIONS COULD RESULT IN FIRE, ELECTRIC SHOCK, OR OTHER INJURY, AND COULD RESULT IN DAMAGE TO THE PRODUCT OR VOID THE WARRANTY.

KEEP AWAY FROM CHILDREN. The Product is not a toy. It contains small parts, such as chassis pins, that can pose a choking hazard. When using the Product near children, closely supervise them.

Keep the Product dry.

Do not use the Product near water or place objects filled with liquids, such as glasses or vases, on the Product, or otherwise expose the Product to liquids or moisture. If the Product gets wet, carefully unplug all cables with dry hands and wait for the Product to air dry completely before charging. Do not dry the Product with an external heat source. Do not charge the Product near water or in extremely humid conditions.

Do not expose the Product to extreme temperatures.

Do not use or place the Product near heat sources such as radiators, heat registers, stoves, or other apparatus that produce heat, including amplifiers.

Do not cover or block the Product.

Remove all packaging before using the Product. Do not cover the Product with cloth or other objects or block airflow to the Product by covering it or trying to operate it in an enclosure, such as a box. Do not place the Product in a built-in installation, such as a bookcase or rack, unless proper ventilation is provided. Do not place the Product on a bed, sofa, rug, or other similar surface.

Avoid rough handling.

Avoid shaking, striking, dropping, or jarring the Product.

Gently clean the Product.

Turn the Product off and unplug the power adapters before cleaning. Handle the Product only with clean, dry hands. Do not submerge the Product. Clean the Product with a soft cloth that has been slightly dampened with water and a touch of rubbing alcohol. Wipe off excess moisture and make sure that the Product is dry before powering on. Do not use compressed air products, such as air dusters, for cleaning. Do not use harsh chemicals, abrasive cleaning products, spray cleaning fluid, or similar chemicals on the Product.

Use the power adapters and cords correctly and safely to avoid fire and shock hazards.

Use only the included power adapters with your AWS DeepRacer. Unplug the power adapters during lightning storms or when you don't plan to use the device for long periods of time. If power adapters or cables appear damaged, stop using them immediately. If a provided plug does not fit into a power outlet, consult an electrician –

do not force the plug into the outlet. The provided plugs are polarized, with one blade wider than the other. This is for safety – do not alter the polarized plugs. Do not overload a power outlet by plugging in too many electronic devices, as this could cause a fire. Do not use the power adapters outdoors. The enclosed power adapters are designed for use with AWS DeepRacer only. Do not use them with any other devices.

 Caution – Handle the batteries properly to avoid risk of fire or explosion.

Use only the removable batteries provided with your AWS DeepRacer or replacements of the same type. Dispose of used batteries responsibly according to local disposal and recycling guidelines. Remove the batteries from the chargers once fully charged. If a battery shows significant signs of damage or distress, stop using it.

Do not store or dispose of batteries where they might be exposed to temperatures below -5° F or above 113° F. Do not disassemble, open, crush, bend, deform, puncture, or shred the batteries. Do not modify or remanufacture the batteries, attempt to insert foreign objects into the batteries, or immerse or expose them to water or other liquids, expose to fire, explosion or other hazard. Only use the batteries for the system for which they are specified. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage or other hazard. For instructions on battery replacement, see the AWS DeepRacer Getting Started Guide. Do not short-circuit a battery or allow metallic conductive objects to come into contact with battery terminals. Avoid dropping the AWS DeepRacer or batteries. If the AWS DeepRacer or batteries are dropped, especially on a hard surface, and you suspect damage, do not attempt repair. Contact Amazon Customer Service for assistance.

The batteries should only be charged using the equipment included with the Product, or other approved equipment. For more information about batteries, go to www.amazon.com/devicesupport.

Do not attempt to repair the Product yourself.

Service is required when the Product is damaged in any way, such as when a power adapter cord or plug is damaged, liquid has entered AWS DeepRacer, objects have fallen into AWS DeepRacer, AWS DeepRacer is exposed to water or moisture, AWS DeepRacer does not operate normally (such as emitting smoke, an unusual odor, or excessive heat), or AWS DeepRacer has been dropped. If you believe the Product may need service, cease using the product and contact Amazon Customer Support at 1-877-375-9365.

Dispose of the Product responsibly.

In some areas, disposal of certain electronic devices is regulated. Dispose of or recycle the Product in accordance with local laws and regulations. For information about recycling the Product, see <https://amazonrecycling-us.re-teck.com/recycling/home>.

Make sure that the network is secure.

To prevent hacking, unapproved third-party access, and exposing AWS DeepRacer to other security risks, always use a secured wireless network. Amazon makes no guarantees for damage resulting from inadequate security.

Using the Product Around Other Electronic Devices

The Product generates, uses, and can radiate radio frequency (RF) energy. If not used in accordance with instructions, the Product might interfere with radio communications and electronic equipment. External RF signals might affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices. Most modern electronic equipment is shielded from external RF signals. If you are in

doubt, check with the manufacturer. To determine if personal medical devices (such as pacemakers and hearing aids) are adequately shielded from external RF signals, ask your physician or the device manufacturer.

FCC Compliance

The Product has been tested and found to comply with part 15 of the FCC Rules. Operation of the Product is subject to the following two conditions: (1) the Product may not cause harmful interference, and (2) the Product must accept any interference received, including interference that may cause undesired operation. The Product has been tested and found to comply with the limits for a Class B digital device or external switching power supply, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The Product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the Product does cause harmful interference to radio or television reception, which can be determined by turning the Product off and on, try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the Product. The Product meets the FCC Radio Frequency Emission Guidelines and is certified with the FCC under the FCC ID number found on the back of the device.

Information About Exposure to Radio Frequency Energy

The output of the radio technology used in the Product does not exceed the radio frequency exposure limits set by the FCC. Install and operate the Product with at least 20 cm (approximately 8 inches) between the Product and your body.

Terms and Warranty

For legal terms and warranty information for the Product, see <https://aws.amazon.com/DeepRacer/terms/> and <https://aws.amazon.com/DeepRacer/warranty/>, respectively.
