

SAP S/4 Move Xperience on AWS - Implementation Accelerator for the Retail Industry with Savantis

Savantis is an AWS Partner Network Select tier and SAP gold level partner

Industry Trends & Challenges

As disruptive technologies continuously emerge and shopper expectations evolve, retailers must be innovative and efficient to stay competitive. Traditional on-premises systems lack the scalability and integration required for Unified Commerce and Digital Customer Engagement and have become increasingly difficult and expensive to scale for growth as retailers struggle with a lack of integration between disparate systems.

Solutions from Savantis and AWS

Savantis enables retail companies to rapidly launch SAP S/4 HANA on Amazon Web Services (AWS) with lower cost and faster time to launch.. Savantis uses their Activate methodology and six-step process to efficiently implement SAP on AWS using proven blueprints and templates in as little as 8 weeks.. Starting with a free consultation, Savantis evaluates the best route for your business by applying pre-defined packages that are based on SAP best practices and industry needs. Savantis not only consults on implementation but also supports and hosts your SAP landscape with SAP Health Checks that focus on the state of your business systems. With Savantis a Certified SAP Channel Partner and AWS Certified Solutions Architect assures you can smoothly gain SAP migration to AWS.

Benefits

Savantis can help implement and support your SAP landscapes on AWS based on SAP best practices and common industry needs. Key benefits include:

Free Consultation

Expert evaluations to determine the best route and starting point

Value Focused Solutions

Pre-packed solutions to fit seamlessly with your business structure

Reduced Risk

Project are “de-risked” via templates, blueprints, and accelerators

Industry Knowledgeable Consultants

Dedicated team with innovative practices and deep industry knowledge

Solution Space

Join AWS to develop cost-effective, scalable, and secure solutions that can enable your customers to achieve their business goals. Solution Space is a collection of featured solutions for many different use cases, built by Amazon Web Services (AWS) and AWS Partner Network (APN). These solutions include architectures that have been validated by AWS, as well as a combination of AWS services and APN Partner technologies that can be deployed quickly through AWS Quick Starts or alternative deployment accelerators.

Key Solutions Overview

SAP-as-a-Service (SAPaaS)

Focus your efforts on business management with the SAPaaS pre-packaged bundle of SAP S/4HANA, Basis Support, help desk support, and rapid deployment templates, minimizing capital expenses and IT resources by hosting on AWS.

What's-in-the-Box

Find the right solution for your business with Savantis' three implementation options: Compact, Premium, and Max. All three packages are based on best practices and include guidance from Savantis consultants with deep industry-specific knowledge and AWS expertise and are tailored to customer requirements.

RetailOn

To appeal to complex Retail customer environments, Savantis developed a solution that focuses on merchandise management to provide real-time customer insights and predictive analytics. RetailOn is hosted on AWS and provides all necessary support to run a competitive Retail business.

How It Works

Savantis uses the SAP Activate methodology which consists of a six-step project lifecycle and experienced consultants to guide every step of the way. Through the steps discover, prepare, explore, realize, deploy, and run, your SAP implementation will be properly executed according to SAP best practices. Savantis will lead the project through to completion and provide post-migration support and maintenance to deliver a smooth transition of SAP migration on AWS.

Getting Started

Savantis provides free consultation services in order to jumpstart your involvement with the best solution for your business structure.
