SAP S/4 Move Xperience on AWS with smartShift

Advanced Automation for S/4HANA Proof of Concepts

Consulting Offer

Rapidly Deploy S/4HANA with your data and customizations on AWS

The critical question is: how hard is it to migrate my functionality and data to S/4HANA? smartShift Intelligent Automation provides definitive answers and proof, without undertaking a “science project”

Benefits

- The “Minimum Viable Product” (MVP) approach migrates functionality and data to S/4HANA on AWS in just weeks
- Your customizations and data allow for real-life testing and S/4HANA learnings
- A follow-up, firm, fixed bid to migrate and run your productive S/4HANA system on AWS
- Modern digital stack for Agile SAP going forward
- SaaS-like SLAs for improved ownership experience

Customer contribution

- Routine system and IT access
- Committed project owner/sponsor
- Time and attention of key stakeholders once POC and road map are delivered
- Does NOT require endless slideshows and long-winded theoretical meetings/workshops

Key activities

Analyze – smartShift will analyze your system. You provide system access, either bring us on site or install smartShift’s extractor

Deploy - the system on AWS – we do the BASIS work (requires full IT access)

Migrate - your customer data into the AWS S/4HANA system using our MVP approach

Convert – smartShift Intelligent Automation converts your customizations to be fully compliant with your target system

Engage – dig into the POC. You will be surprised at how much functionality works on day 1. Maximize attention and make the optimal decisions

Innovate – use this migration to upgrade the entire stack and ownership experience while high grading the efforts you choose to keep in-house

Solution space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.
