

MyPath™ to Work is a **comprehensive, modular technology solution** which can empower organizations to manage new health risks presented by COVID-19 to **recover with resilience.**

With a combination of tightly integrated Deloitte and third-party technology and services, MyPath™ to Work is designed to enable enhanced workplace safety protocols, visibility into risk factors, agile response to changing health conditions, and engagement and support for colleagues – all configured to the specific needs of each organization.

Built on Deloitte's robust ConvergeHEALTH platform that is live in 22 countries supporting millions of individuals, MyPath™ to Work can help **jumpstart organizational readiness** for recovery.

How it works:

Enhanced Screening Support

Digitizes CDC or employer screening procedures for COVID-19 into a seamless user experience and enables streamlined non-contact temperature monitoring and other real time capabilities at scale

Facilitates smooth and efficient safety procedures; can be tailored to different safety protocols as required by local regulations

Analytics and Management Reporting

Aggregates and analyzes de-identified information to effectively stratify, target and engage potentially exposed employees

Provides real-time insights; contextualizes risk among cohorts, allows organizations to isolate contagions and preserve business continuity

A robust, flexible, and scalable platform enabling secure flow and management of sensitive data and integration of solution modules. Designed to securely handle PHI and PII; HIPAA and GDPR capable

Connected Colleague Hub™ Powered by AWS

Enhances capabilities to manage, analyze, and act on sensitive data which are becoming important for resilient recovery of the business in a new environment with AWS as the underlying infrastructure

Digital Contact Awareness

Securely and anonymously tracks those in close proximity and automates notification of potential COVID-19 exposure

Enables multi-modal collection of data on an opt-in basis leveraging an evolving ecosystem of protocols and partners

Case Management and Employee Engagement

Enables efficient, data-driven case management for at-risk employees, multiple modes of outreach, and tools to provide safety and health education

Expands capabilities to engage and support potentially exposed and COVID positive employees and interface with employee health journey management

Key benefits:

Customizable

to the unique circumstances and requirements of your organization

Efficient

by directing attention and resources with efficiency through automation and integration of workflows

Risk Aware

through data analytics to model and assess risks and inform decisions

Human-centric

by empowering employees with information and intuitive tools and enabling new levels of support and engagement
