The benefits of an AWS Skill Builder Team subscription

**Top 5 benefits of AWS Skill Builder for Teams**

1. **Accelerate business transformation**
   Drive critical skills to achieve your organizational goals by assigning training and curated learning plans. Track progress as teams dive into hands-on labs, game-based learning, builder challenges, and enhanced exam prep resources—all built by the experts at AWS.

2. **Encourage hands-on experience**
   Teams can build and implement AWS services with hands-on lab experience in an AWS Management Console environment without risk of disruptions or unanticipated expenses. Learners follow step-by-step instructions and develop practical experience they can apply right away.

3. **Develop expertise in key roles and industries**
   Teams can practice creating advanced solutions for common use cases within their role or industry with guided solution-building assignments. Learners can also earn official AWS digital badges to share with their network.

4. **Motivate teams with collaborative learning and friendly competition**
   Develop expertise with problem-solving skills and open-ended cloud challenges. Engage teams with interactive learning sessions and game-based friendly competitions to encourage shared learning, creativity, and trust.

5. **Fast-track career development for team members**
   Help your workforce earn AWS Certifications to showcase their expertise and accelerate their career growth. Get employees ready with AWS Certification Official Practice Question Sets and Exam Prep courses and AWS Certification Official Practice Exams. Provide the in-depth experience necessary for exam day success.

“Leaders understand the importance of staff retention, and fostering a culture of learning and development is key. I believe continuous learning and personal growth are critical to an individual’s career. It was a clear choice to provide AWS Skill Builder Team subscription to our engineering staff, enabling them to fine-tune their skills, contribute to CloudCall’s goals, and advance their own career ambitions.”

Alan Churley, Director of Software Engineering, CloudCall
