

AWS Training and Certification **Ramp-Up Guides**

“ The companies that really succeed are the ones that train significant numbers of people. We train hundreds of thousands of people a year just for that reason because once you get that firm base and experience, it becomes much easier. ”

ANDY JASSY, CEO OF AWS¹

Transformation begins **with training your builders.**

At re:Invent 2019, Andy Jassy spoke about the four differentiators for companies that make cloud transformation successful:

- ✓ **Conviction of, and alignment with, senior leadership teams.**
- ✓ **Aggressive top-down goals.**
- ✓ **Training your builders.**
- ✓ **Not letting “paralysis” stop you before you start.**

Training is critical, because the skills gap is real. A survey by 451 Research showed that 90% of IT decision makers report a gap between teams' skill levels and knowledge required to achieve organizational objectives.² Yet, as a leader tasked with driving your organization's cloud transformation, it can be difficult to know how to close this gap.

Start your transformation **today.**

You can start training your builders today with AWS Training and Certification Ramp-Up Guides. Categorized by role or solution, each guide is a blueprint that removes the guesswork of where to start learning. They can help learners progress in their training with a curated progression of recommended resources for developing AWS Cloud skills—digital and classroom courses, certifications, whitepapers, videos, and more.

We're here **to help.**

You recognize you may have questions and we also recognize some organizations may prefer, or benefit from, a more structured, deliberate approach to cloud skills training. You can work with AWS Training and Certification experts to conduct a free AWS Learning Needs Analysis to identify the right training for your organization, teams, and employees based on a structured assessment of their current cloud skills.

Contact us today to talk with one of our experts. They can help you plan and implement the training program you need.
